# Agenda

---

Setting the stage – what is SAP HANA Cloud Platform?

Value proposition Analytics + Agile Data Marts in the cloud

Relevant capabilities in SAP HANA Cloud Platform

- Load data
- Create views
- Create visualizations + dashboards
- Embed in context

Roadmap

Summary

# Setting the stage

# SAP HANA Cloud Platform

## Introduction

**Build**, **extend**, and **run** next-generation applications on SAP HANA in the cloud

[hcp.sap.com](http://hcp.sap.com)

# Typical Scenarios on SAP HANA Cloud Platform

Extend your business to the cloud

Mobile-ready, feature-rich

**UIs**

= productivity and  
customer satisfaction

Seamless

**business process**

extensions and integration  
= greater agility

Real-time

**analytics**

= success in your  
window of opportunity

Rapid

**application**

build and deployment  
= quicker time to value

# SAP HANA Cloud Platform – Overview Current State

Build

Extend

Integrate

On-Premise /  
Managed Cloud

SAP S/4 HANA

SAP Business Suite

SAP Business  
Warehouse

## SAP HANA Cloud Platform (PaaS)

### Runtimes / Languages

Java

XSJS

HTML5

### Platform Services

Integration

IoT

Security

Analytics

UX

Mobile

Collaboration

### Data & Storage Services

ASE

### Big Data Services

HANA

DevOps

SaaS

SAP S/4 HANA

SuccessFactors

C4C

Ariba

Concur

IaaS Layer

# SAP HANA Cloud Platform – Overview Current State

Focus of this session

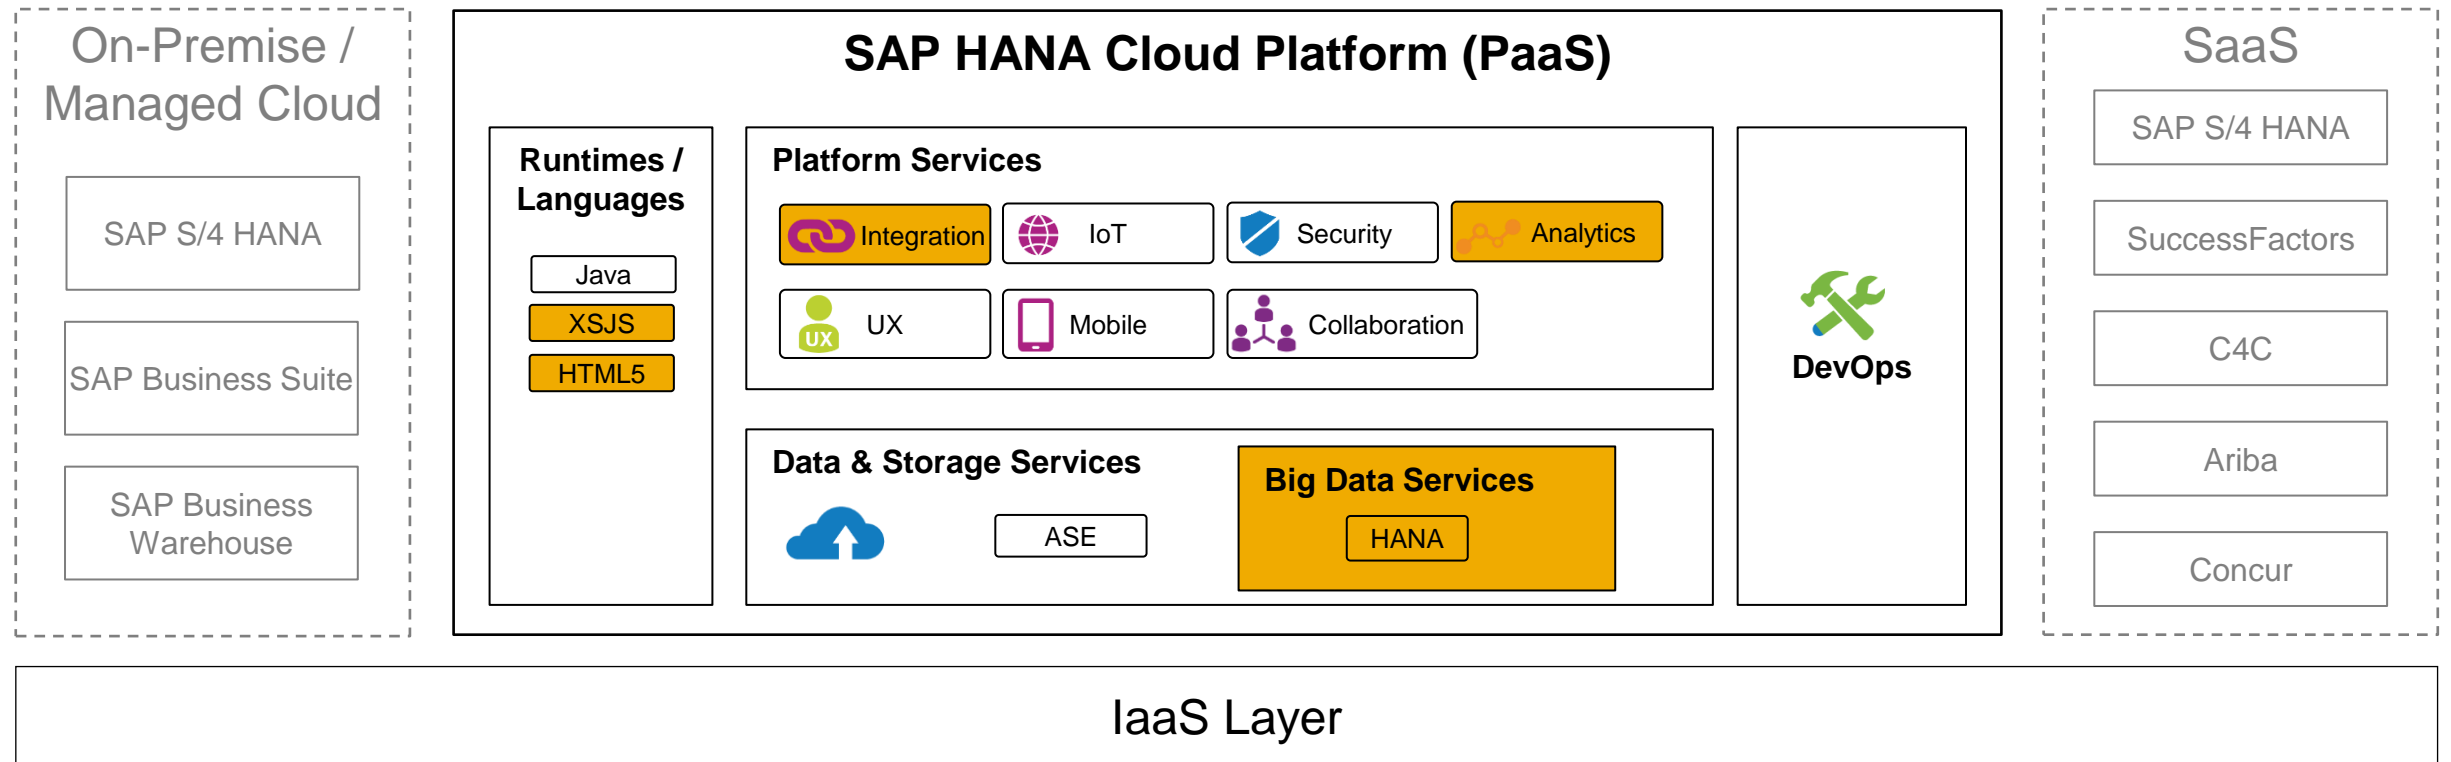

Build

Extend

Integrate

# **Value proposition Analytics + Agile Data Marts in the cloud**

# Use Case (Illustration)

Variety of data sources (some examples) → Model views + create dashboards → Embed in context

OnPremise

SAP Systems

SAP Cloud

Success Factors

S4 HANA

Things (sensor data)

Tweets & feeds

Load data (replicate)

SAP HANA Cloud Platform (Platform-as-a-Service) account

embed

Fiori launchpad

Cloud Portal

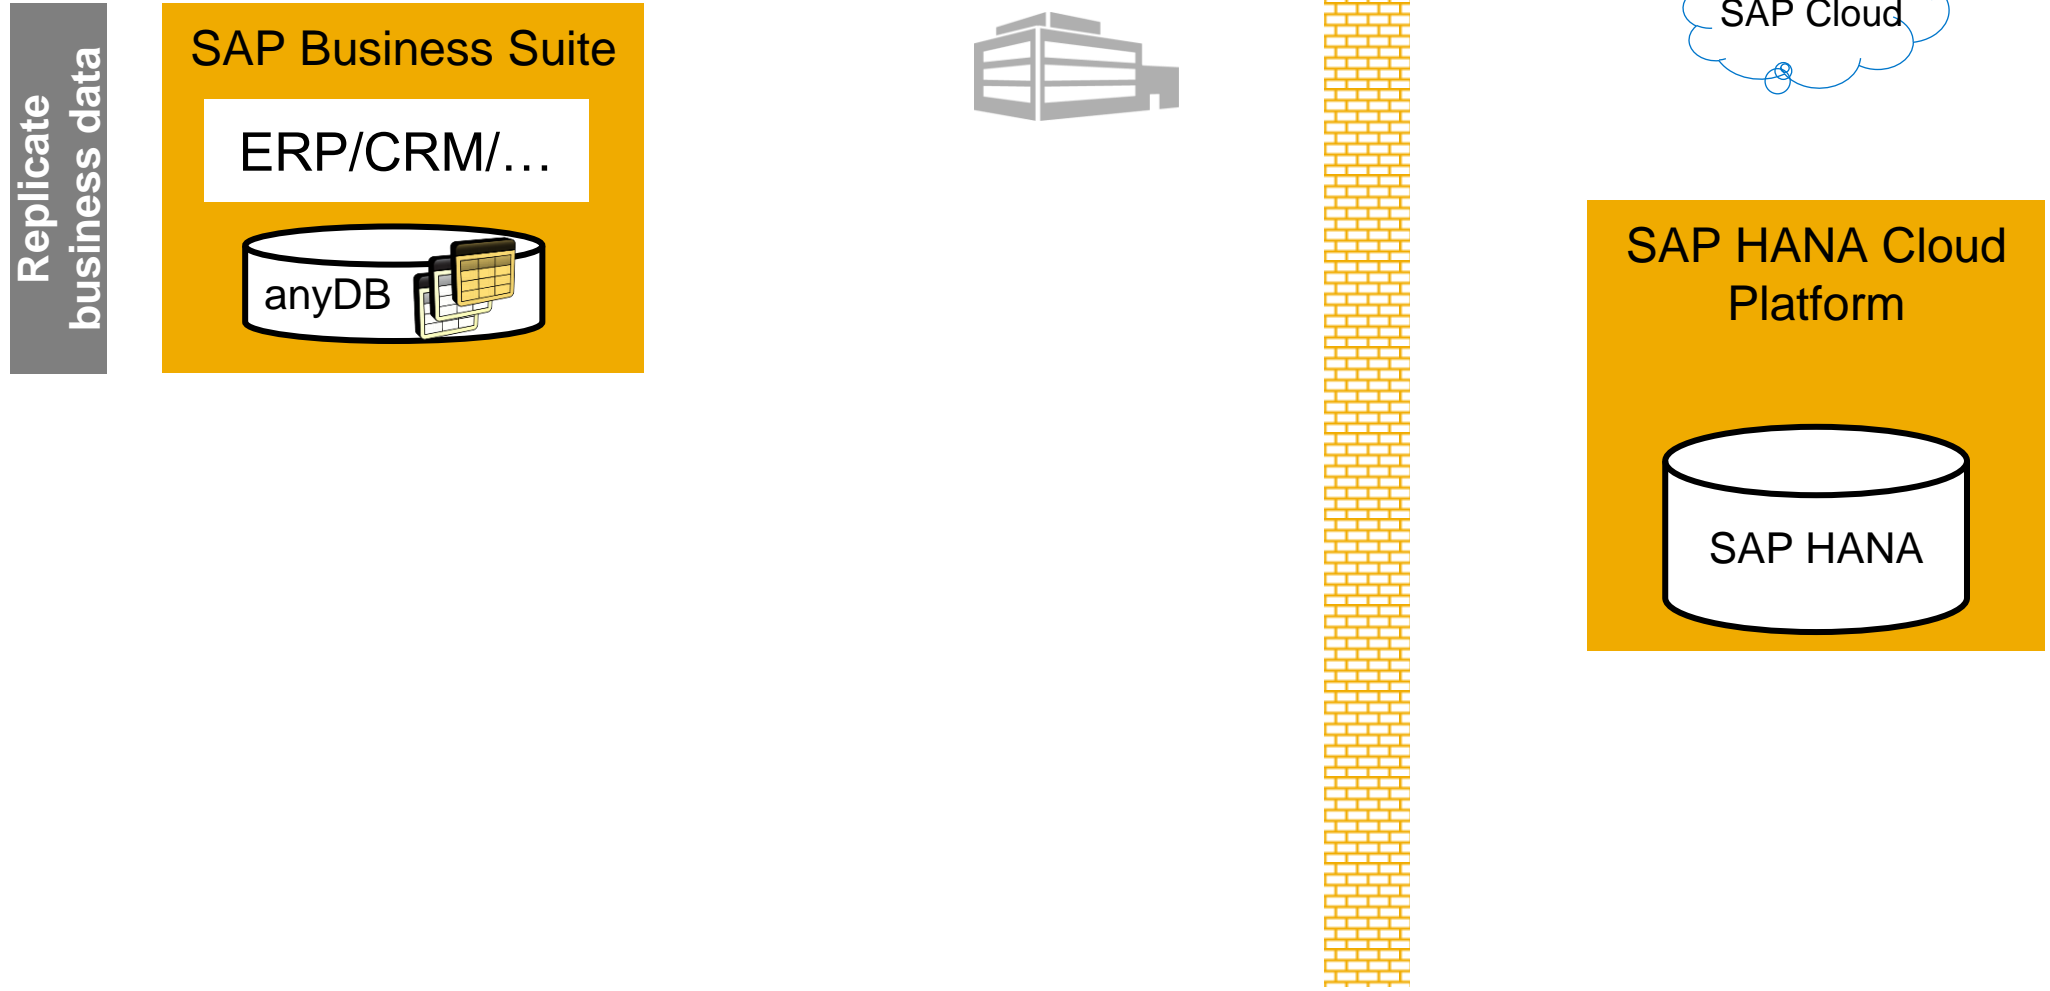

SAP Cloud apps (SaaS)

\* Planned capabilities / services

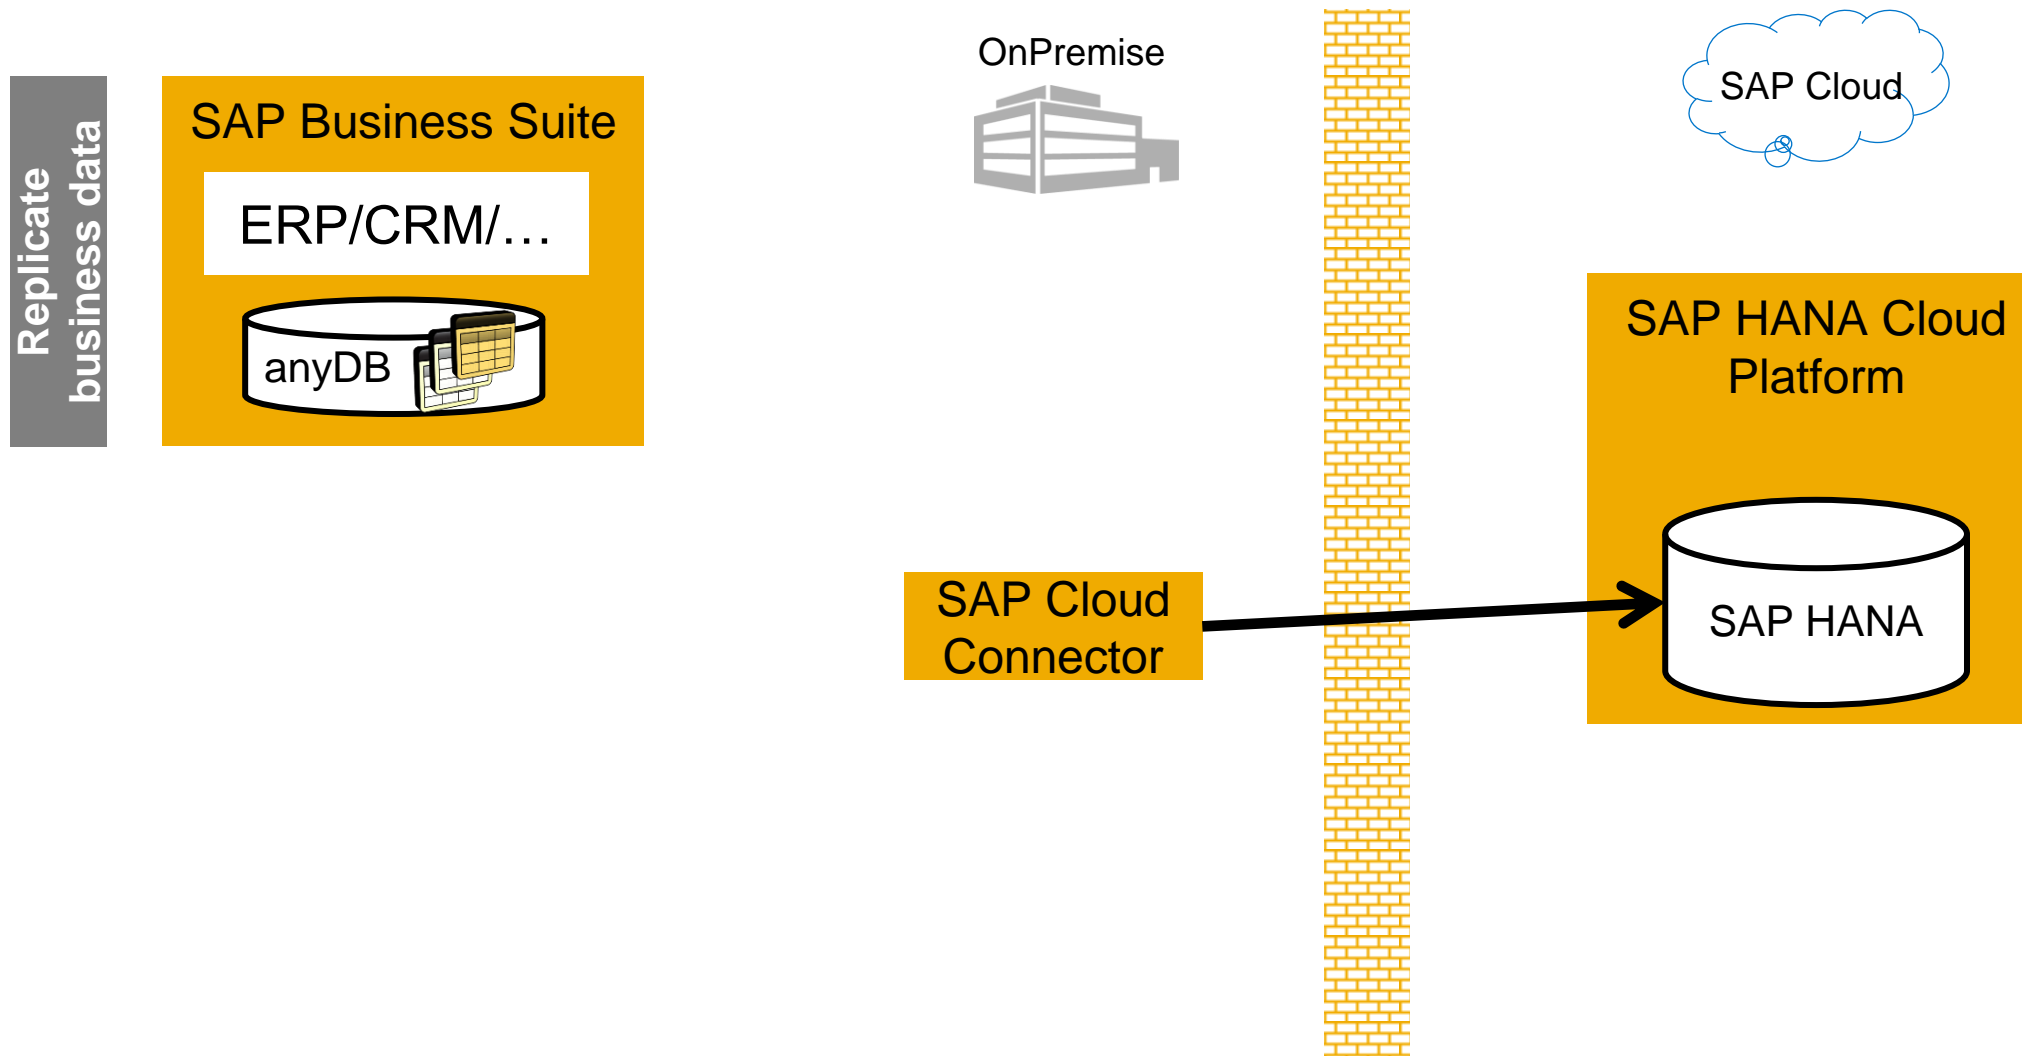

# Scenario

# Scenario

## Setup and required components

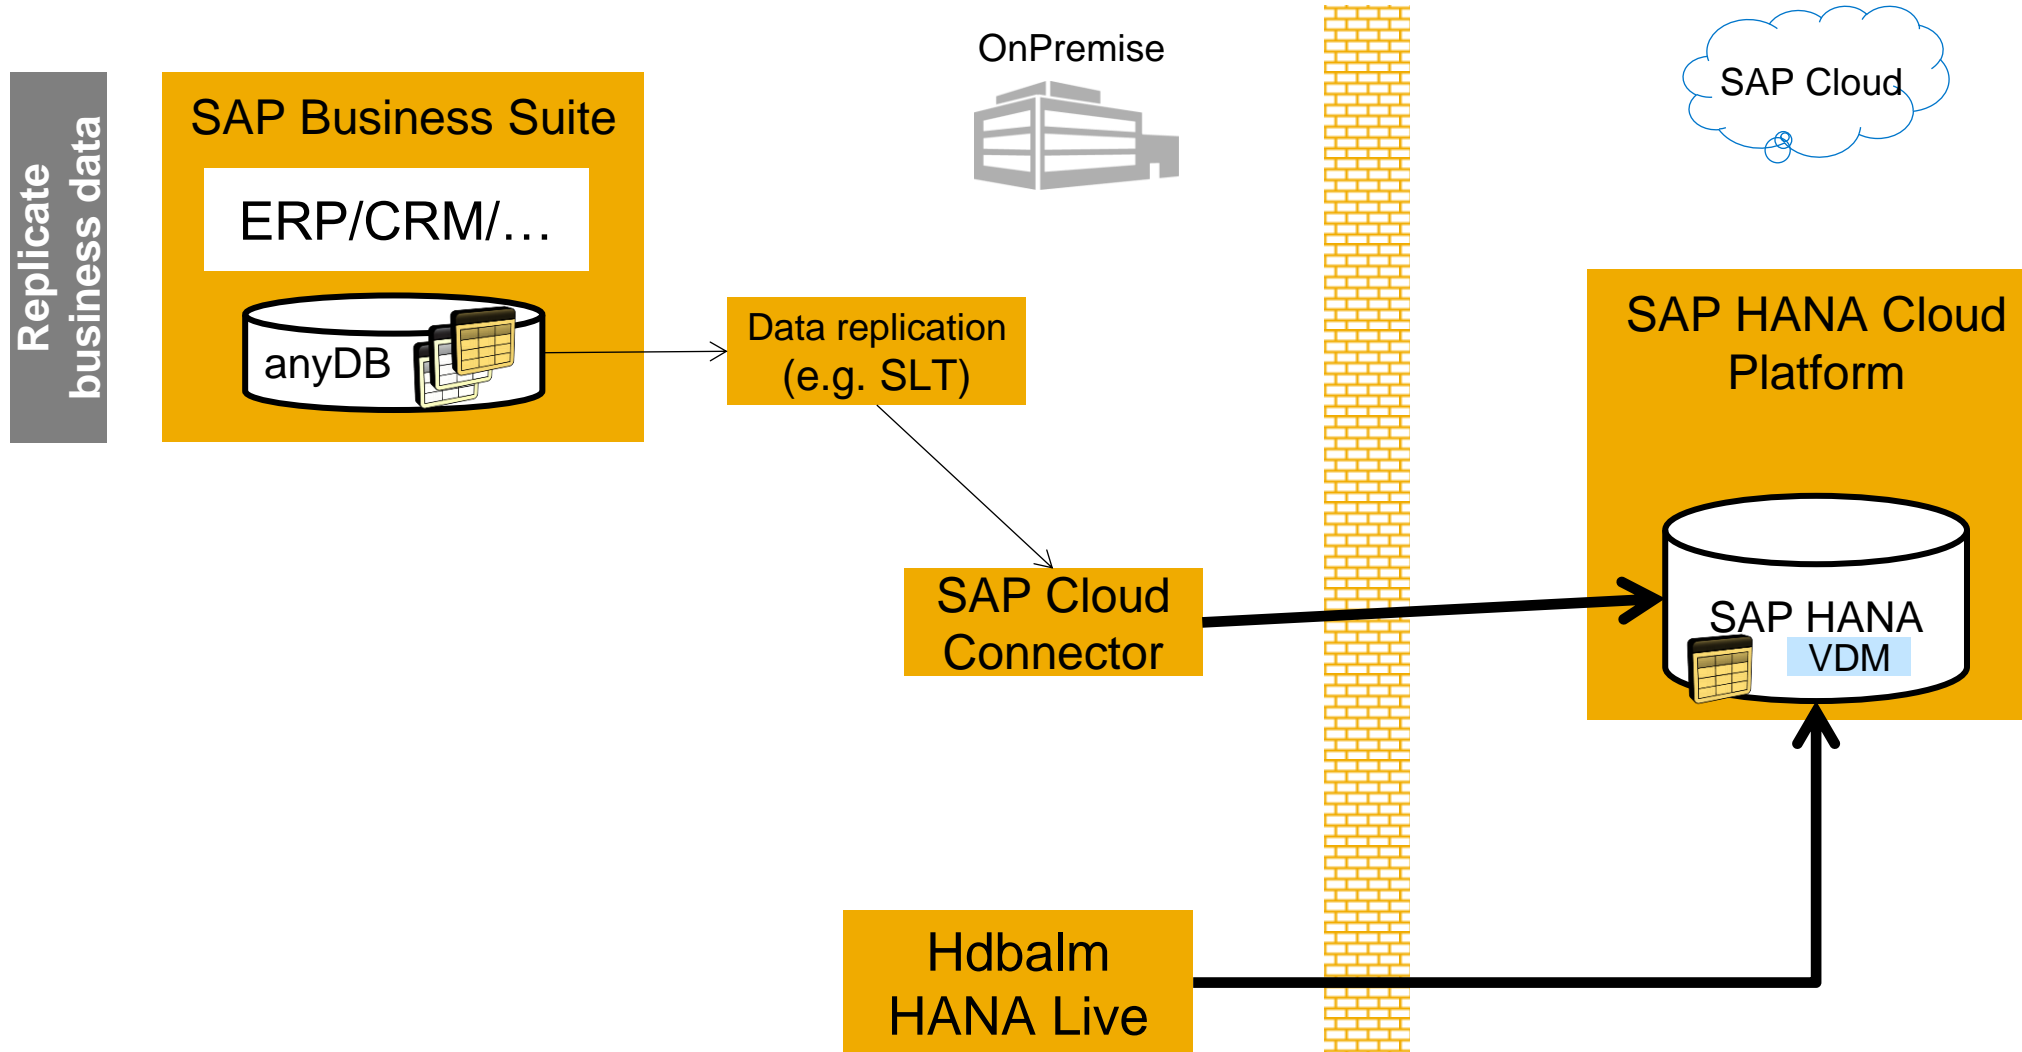

# Scenario

## Setup and required components

# Scenario

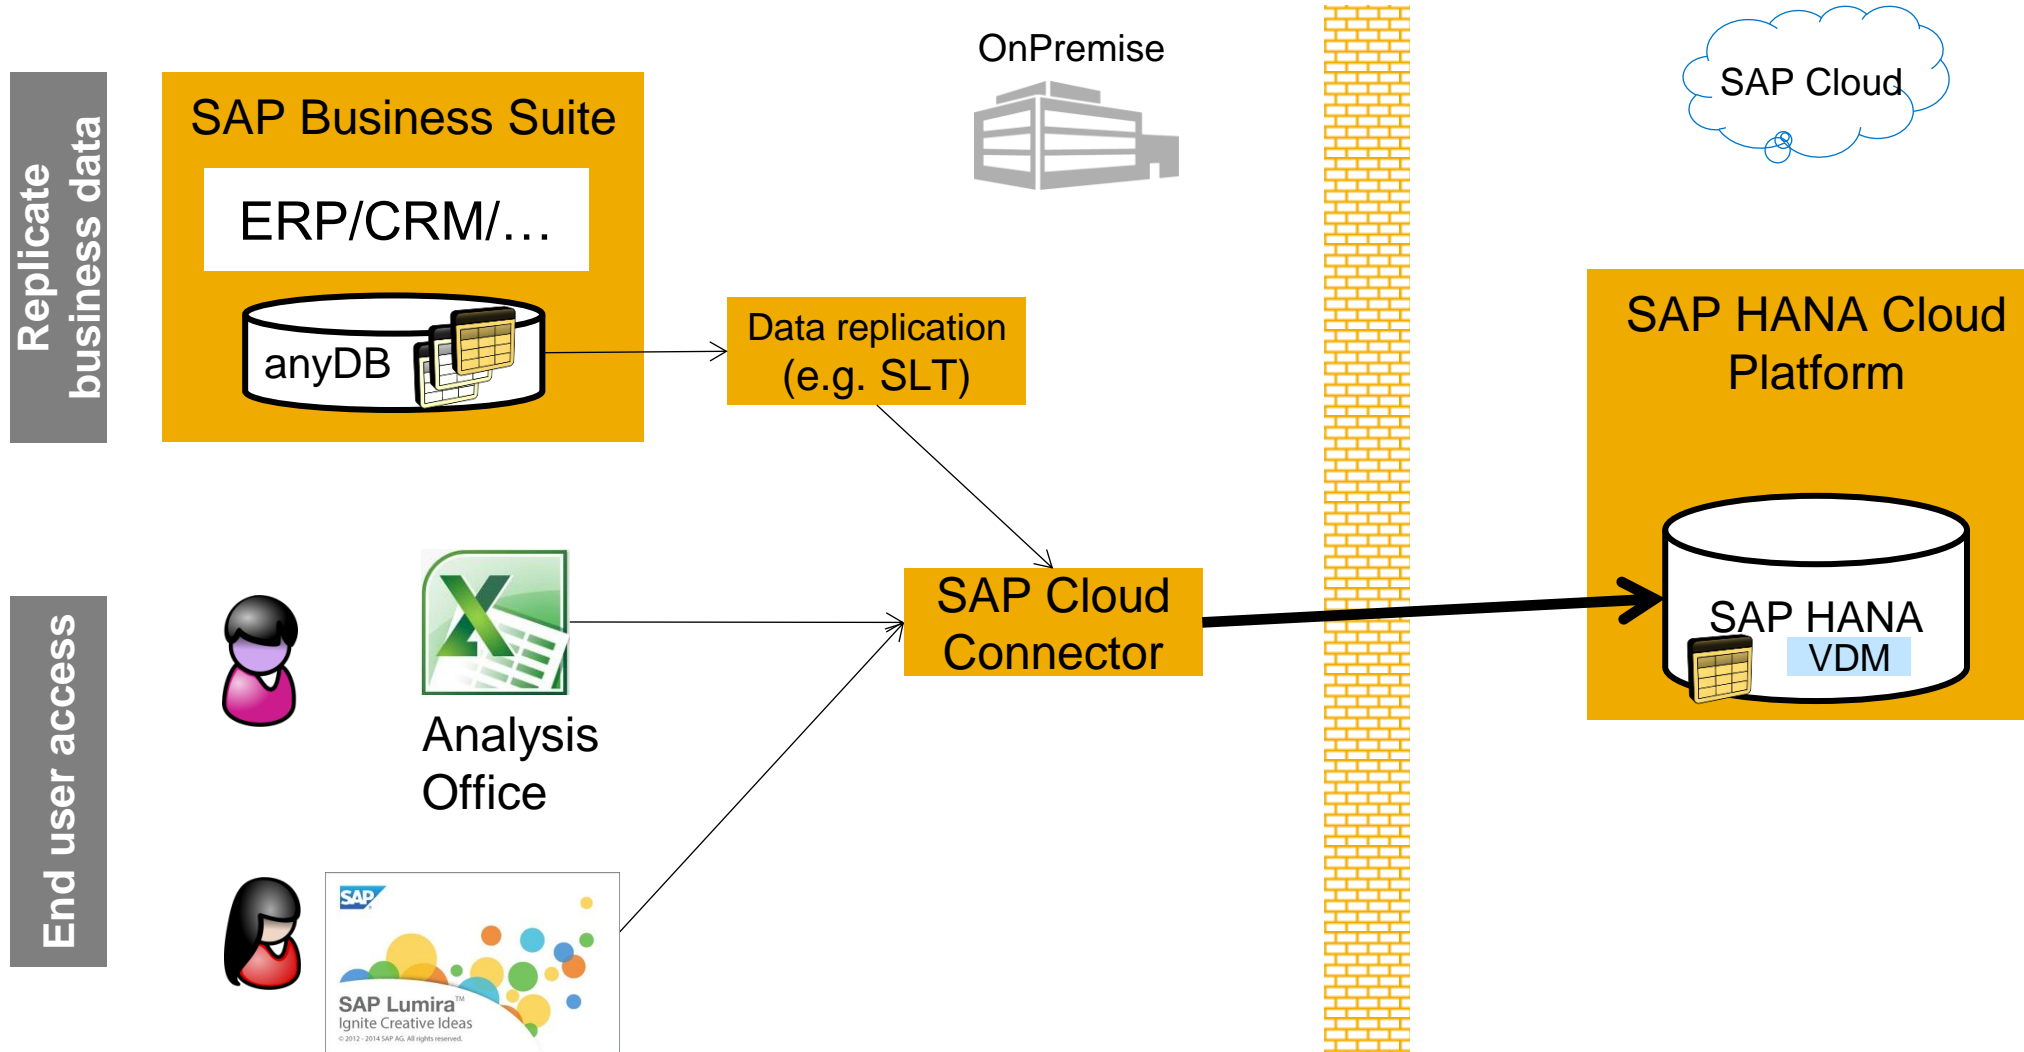

## Setup and required components

# Scenario – Outlook

## Planned cloud capabilities

\* Currently restricted availability

\*\* Planned capabilities / services

# Relevant capabilities in SAP HANA Cloud Platform

Load data

Create views

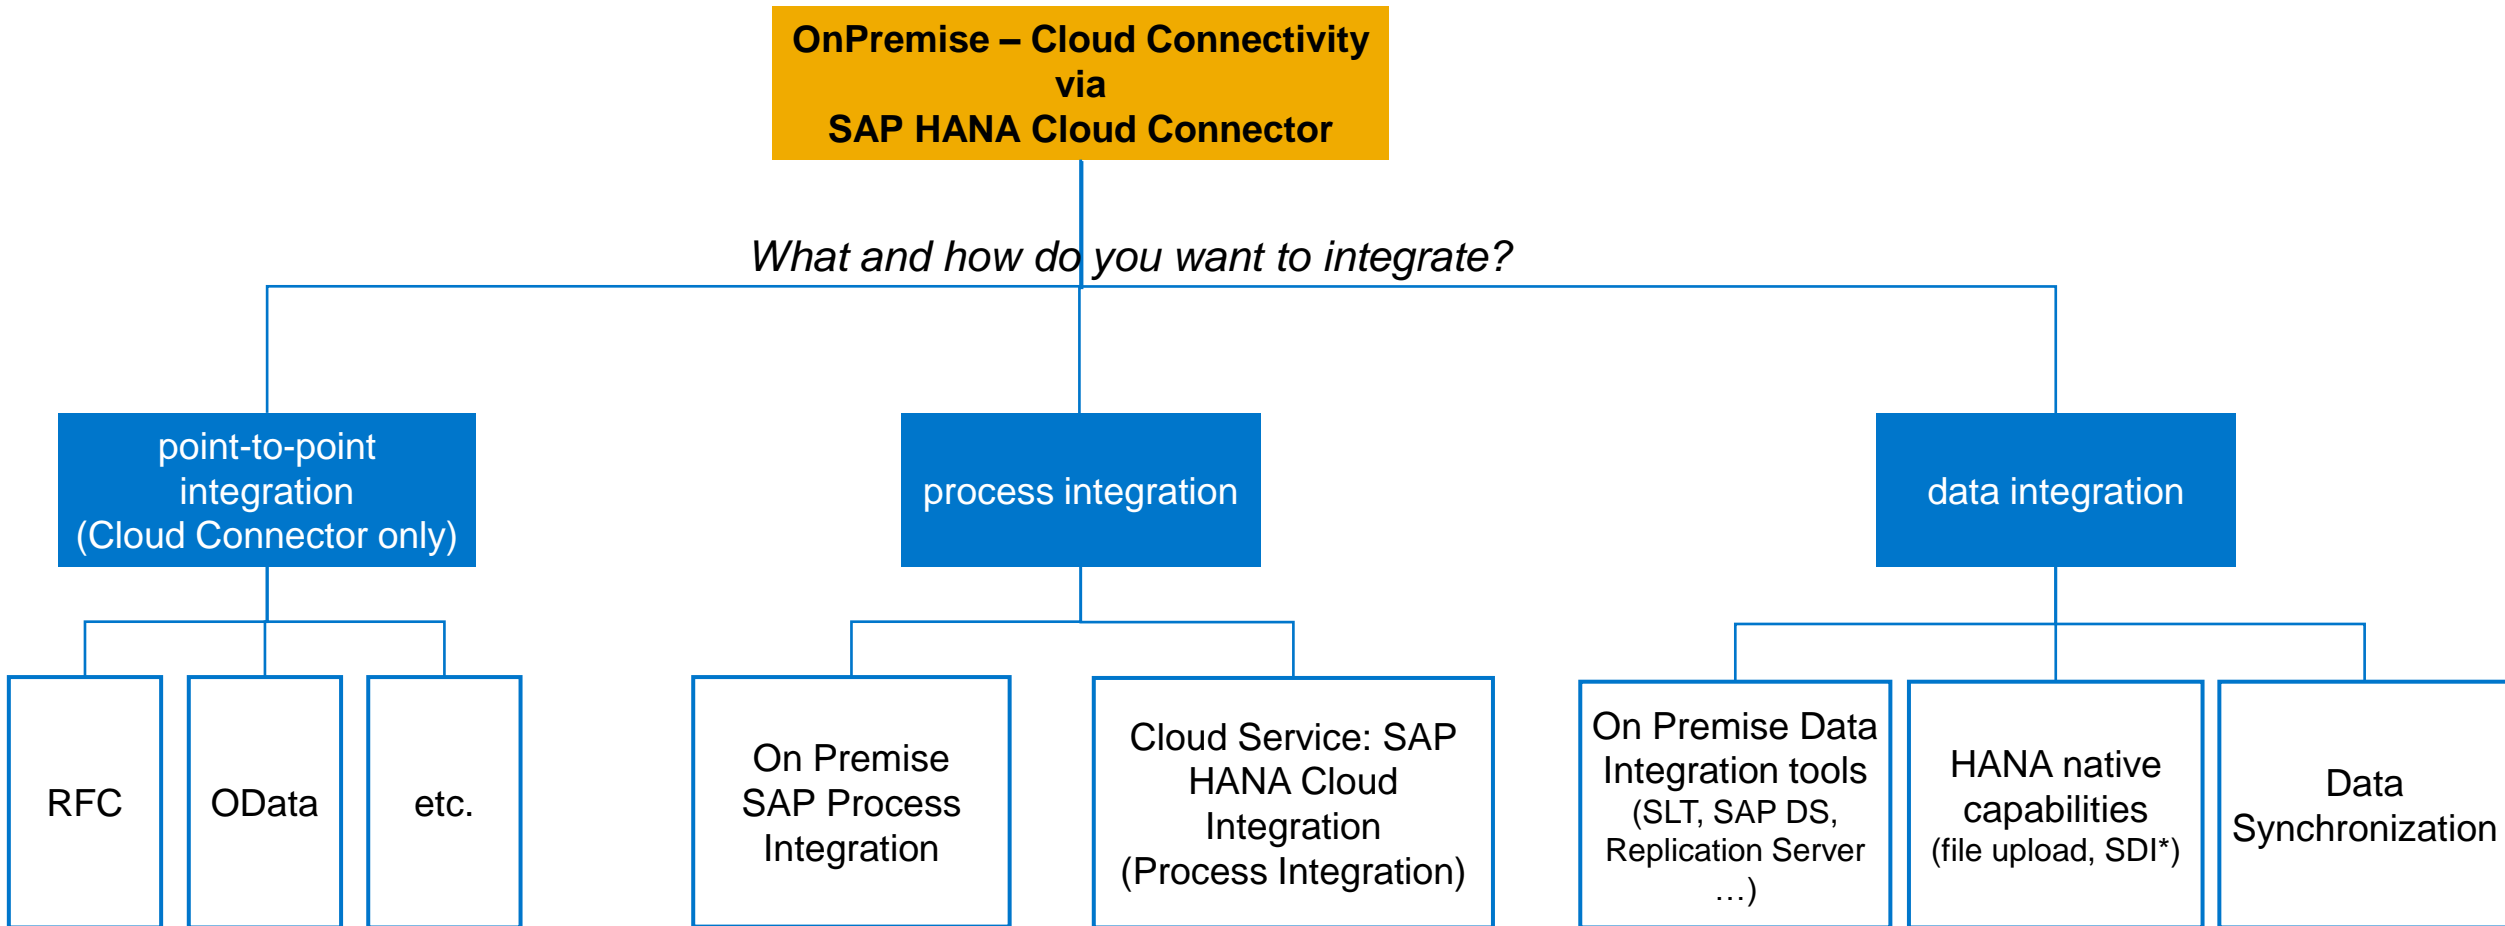

Create visualizations + dashboards

Embed in context

# Integration options

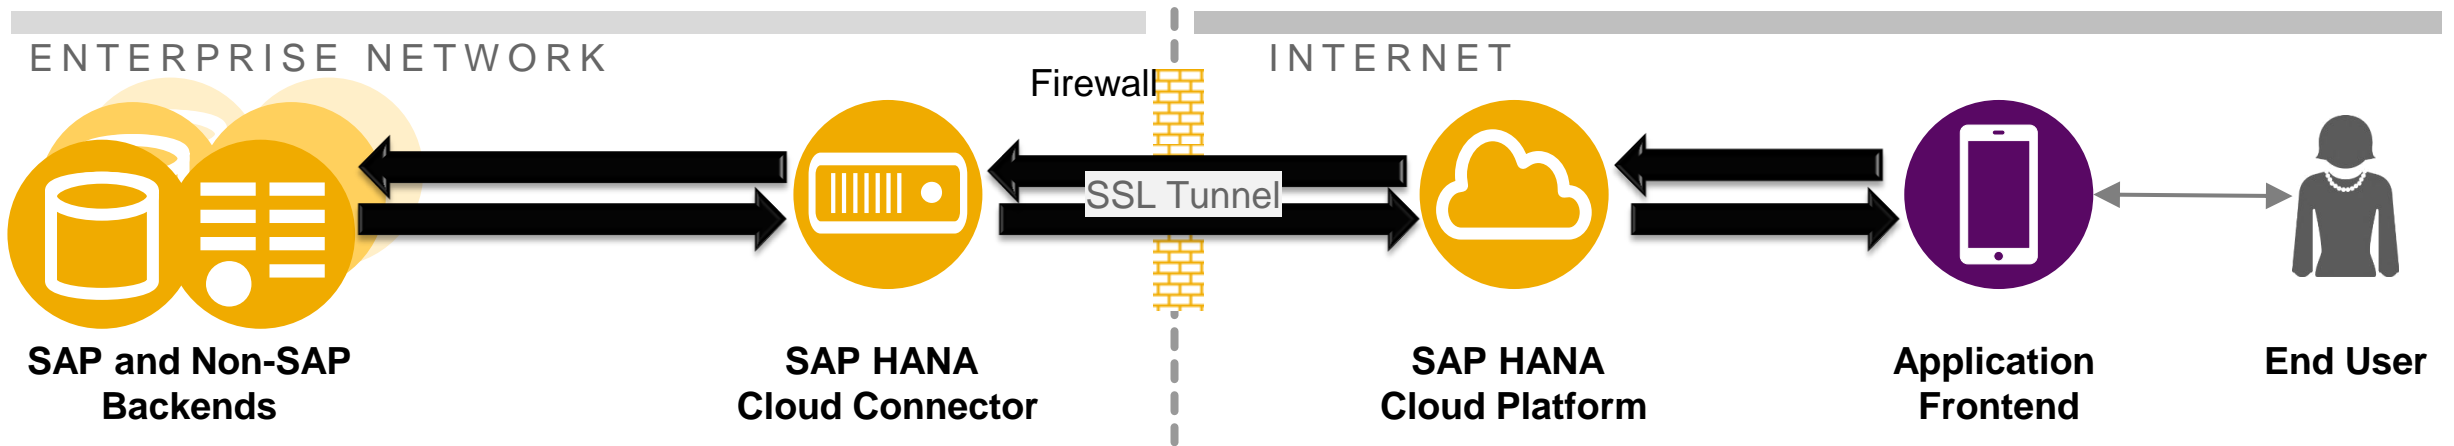

## SAP HANA Cloud Platform & On Premise systems

\* Planned capability

# Hybrid Setups

## On-Premise – Cloud Connectivity

### SAP HANA Cloud Connector can establish secure connectivity for hybrid cloud – On-Premise setups

- Allows access from whitelisted applications on SAP HANA Cloud Platform to whitelisted backend systems (option to restrict to selected OData services and RFC calls)
- Allows access from backend systems to whitelisted database on SAP HANA Cloud Platform

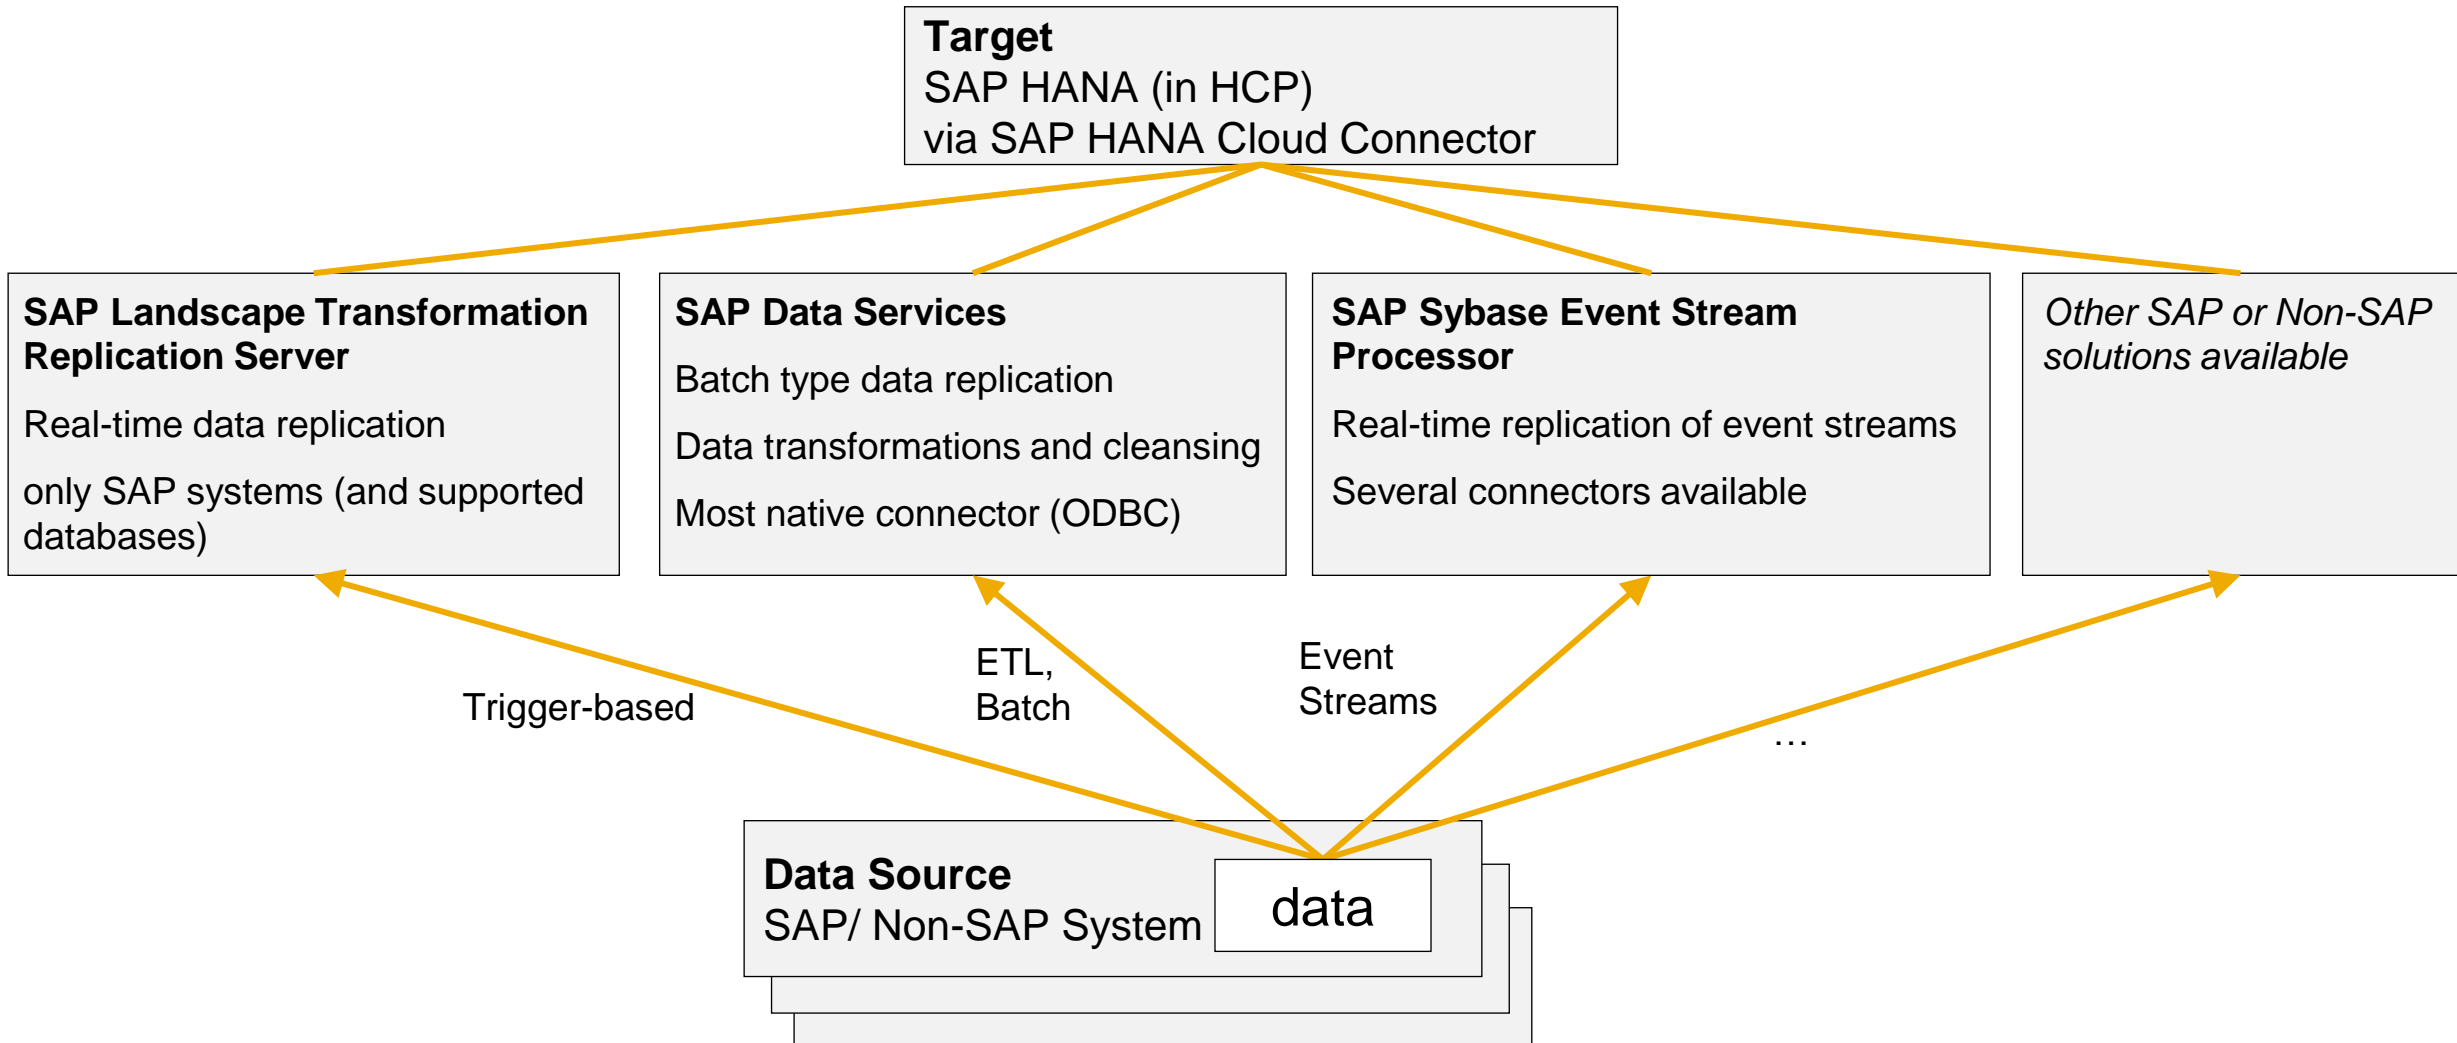

### Options to monitor the Cloud Connector status:

- Via SAP HANA Cloud Platform Cockpit (Connectivity tab)
- Via basic healthcheck URL

### SAP HANA Cloud Integration available as additional service for process integration capabilities

# Data integration tools from SAP

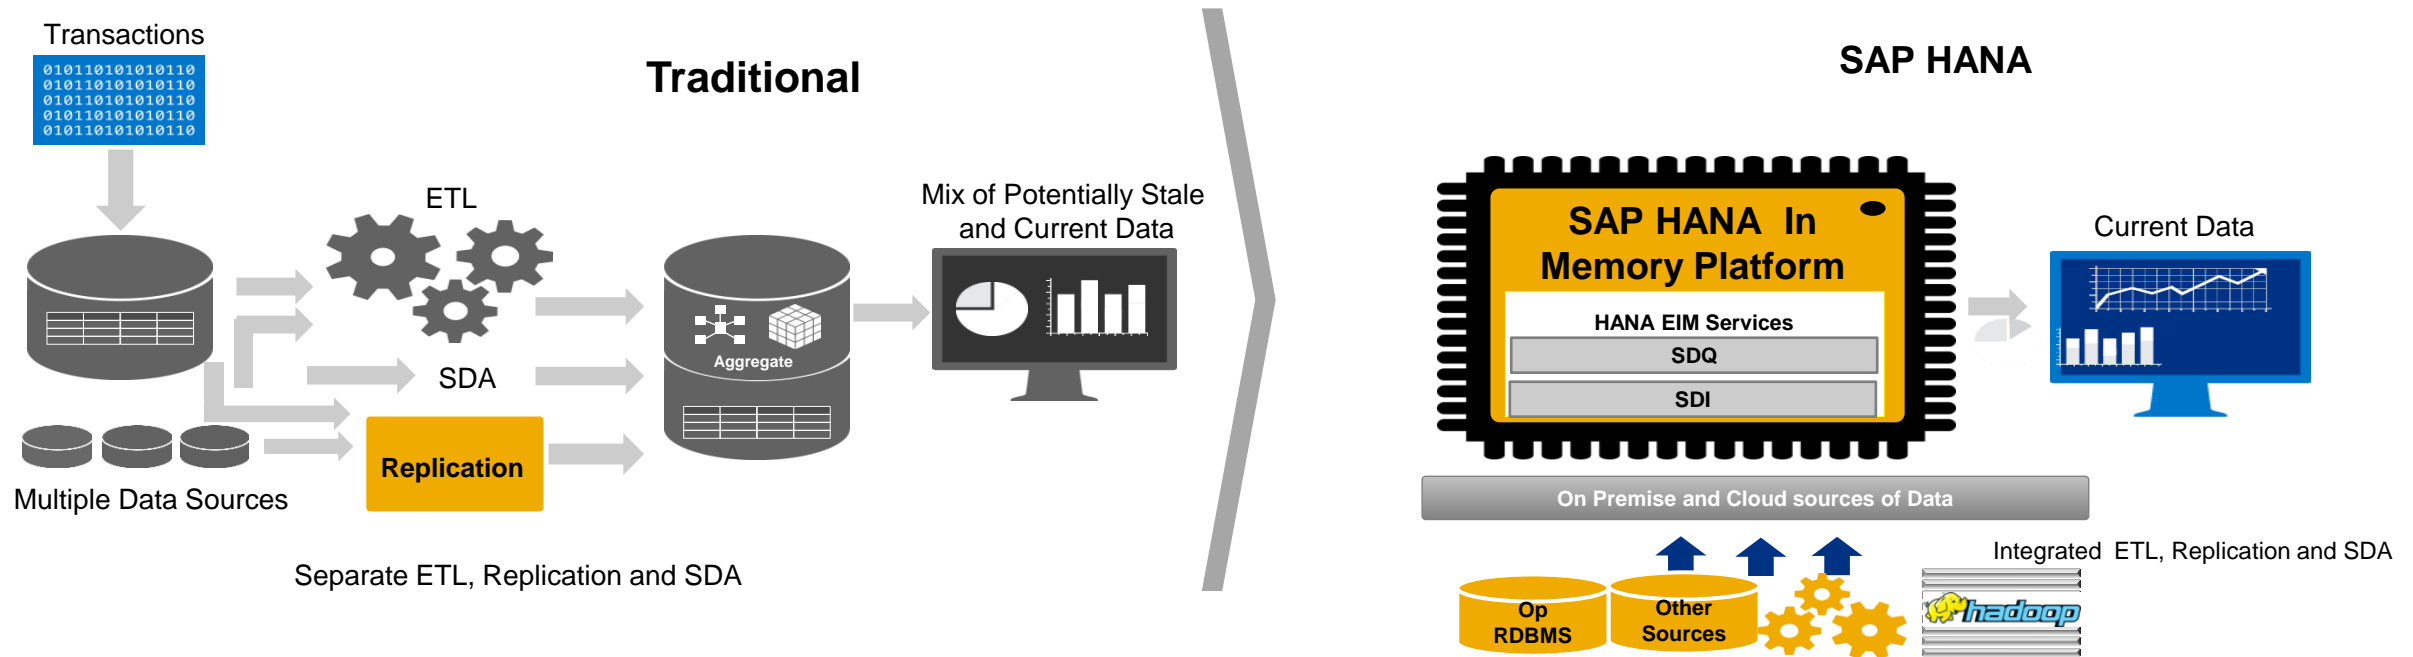

## Some options

# SAP HANA Enterprise Information Management (EIM)

## Outlook - planned capabilities for SAP HANA Cloud Platform

- **Simplified Landscape** – Federation, Replication & Transformation, all within the SAP HANA platform
- **Accelerated** – In memory performance and lower latency
- **Open Framework** – Supports data of any shape, style and size with an SDK for new data sources

# Relevant capabilities in SAP HANA Cloud Platform

Load data

Create views

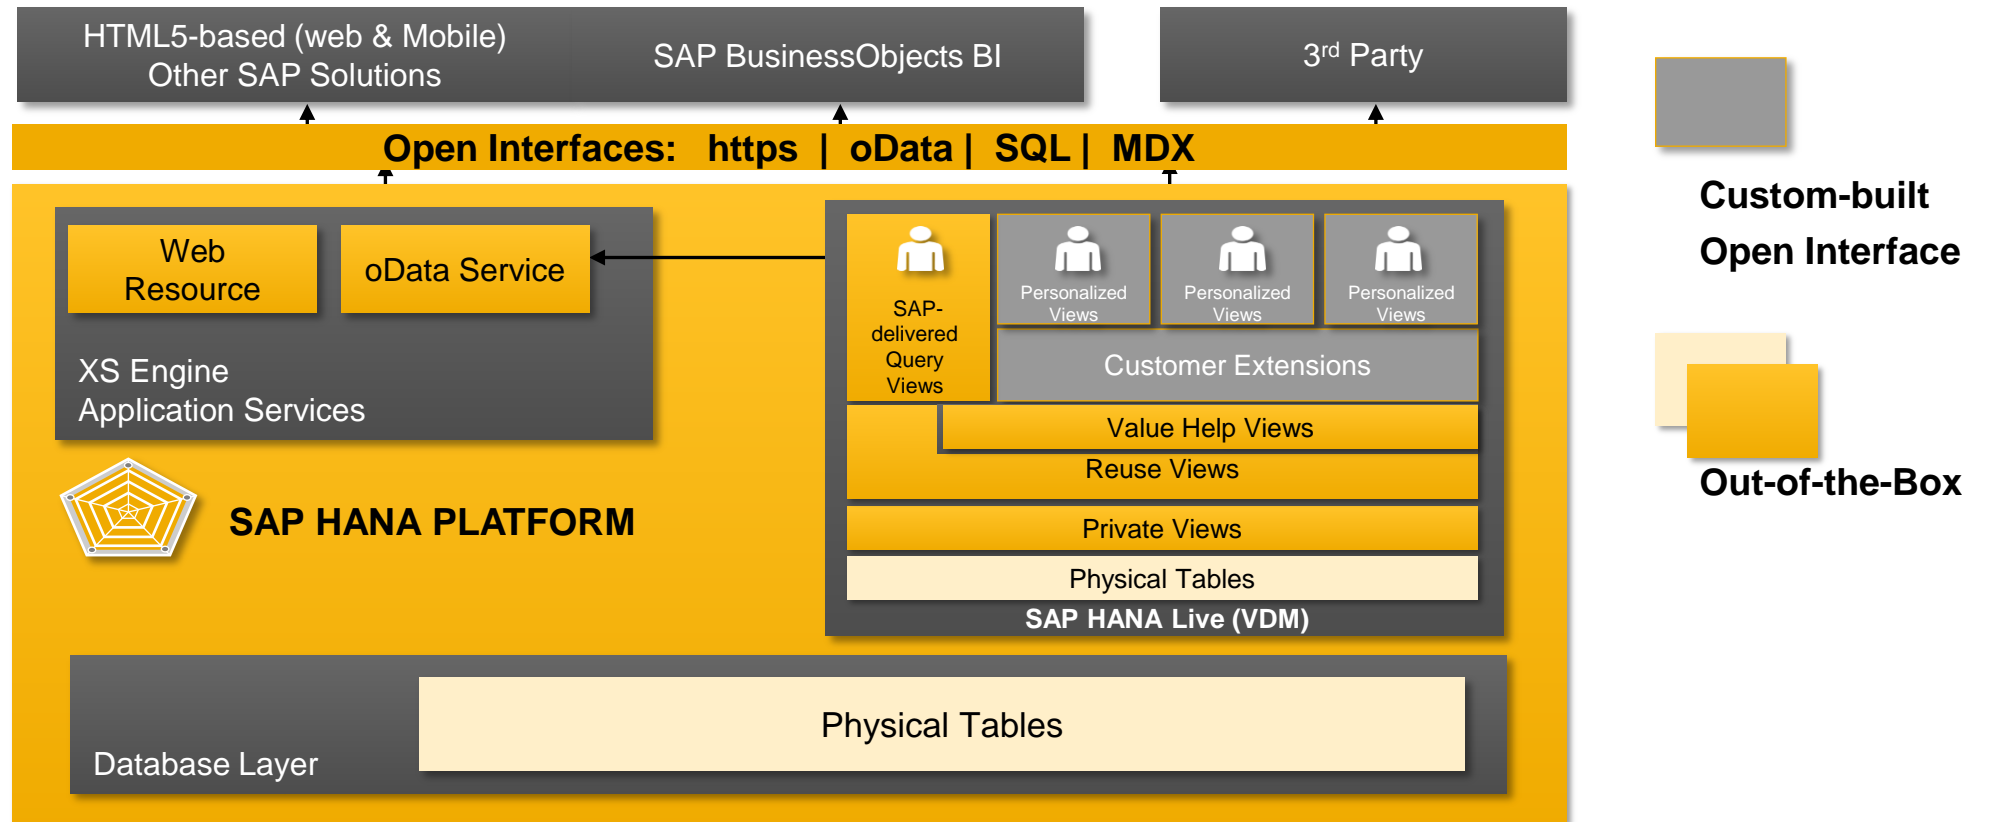

Create visualizations + dashboards

Embed in context

# SAP HANA Live architecture

## Foundation for new class of applications

**Atomic**

**instantaneous**

**Pre-defined**

# Relevant capabilities in SAP HANA Cloud Platform

Load data

Create views

Create visualizations + dashboards

Embed in context

# SAP and SAP BusinessObjects (SBO) Clients

## Clients recommended for the use with SAP HANA Live

**SAP Crystal Reports**

**SBO Analysis Office**

**SAP Lumira**

**SBO Design Studio**

Connect local BI client tool via central SAP HANA Cloud Connector

But: be aware that performance is sensitive to network conditions when using local clients connecting to remote databases (in cloud)!

# Create your own analytical application

Leverage SAPUI5 libraries to easily create charts and visualizations

Create Fiori-like user interfaces including charts - easily visualize data persisted within SAP HANA (in SAP HANA Cloud Platform).

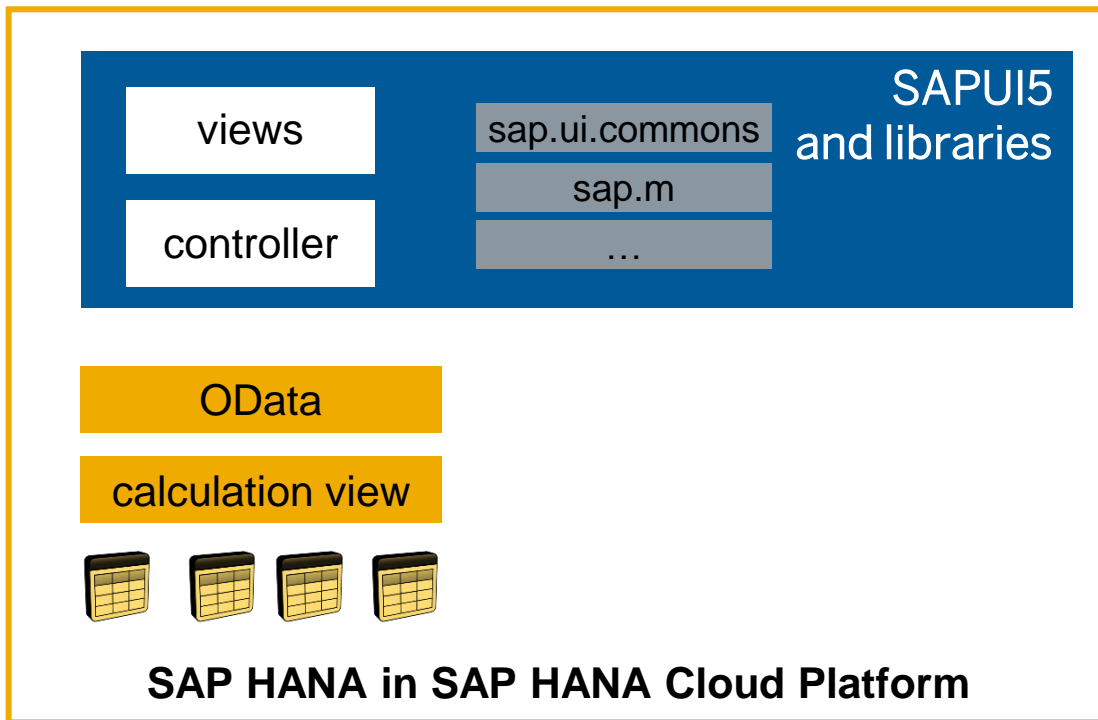

Additional steps involved:

- Expose SAP HANA calculation views with OData service
- Bind data using SAPUI5-controllers
- Create visuals using SAPUI5-views

For samples of SAPUI5 controls see:

<https://sapui5.hana.ondemand.com/explored.html#/entity/sap.viz.ui5.controls.VizFrame/samples>

Alternatively: create HTML5 application in WebIDE + bind to data in HANA

# Predictive Analysis Library

## Capability for SAP HANA Cloud Platform – predictive services on top

Create dashboards for existing data – and based on that make predictions for future trends.

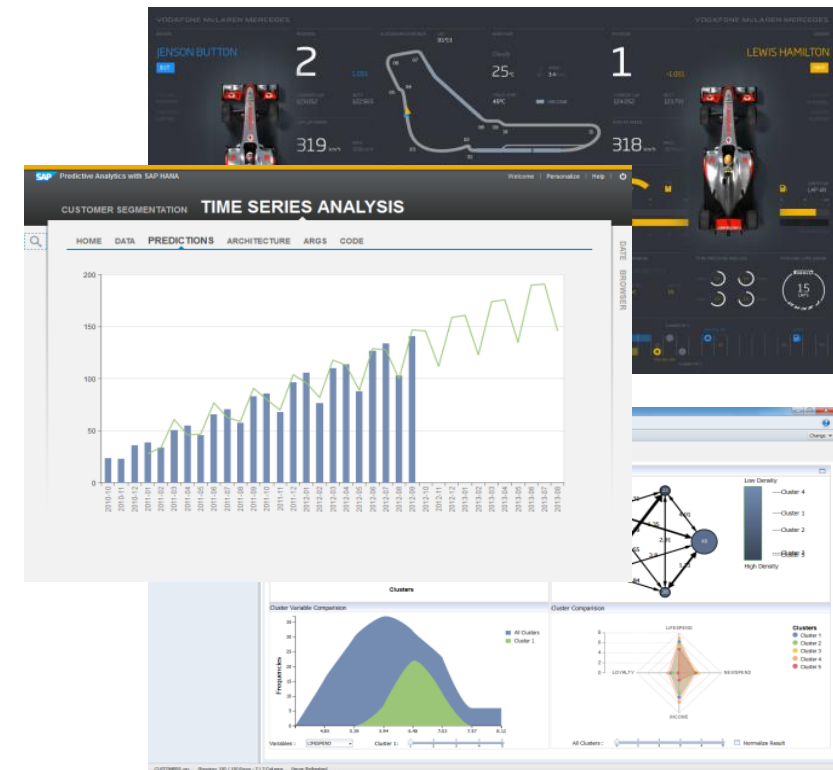

The Predictive Analysis Library is a built-in and native SAP HANA library to perform in-database data mining and statistical calculations.

### Key capabilities

- Support over 60 algorithms in the area of:
  - Association
  - Classification
  - Clustering
  - Preprocessing
  - Regression
  - Social Network Analysis
  - Statistics
  - Time series

### Benefits

- Native predictive algorithms
- In-database processing for powerful and fast results
- Quicker implementations and embed predictive into applications, solutions, and BI environments

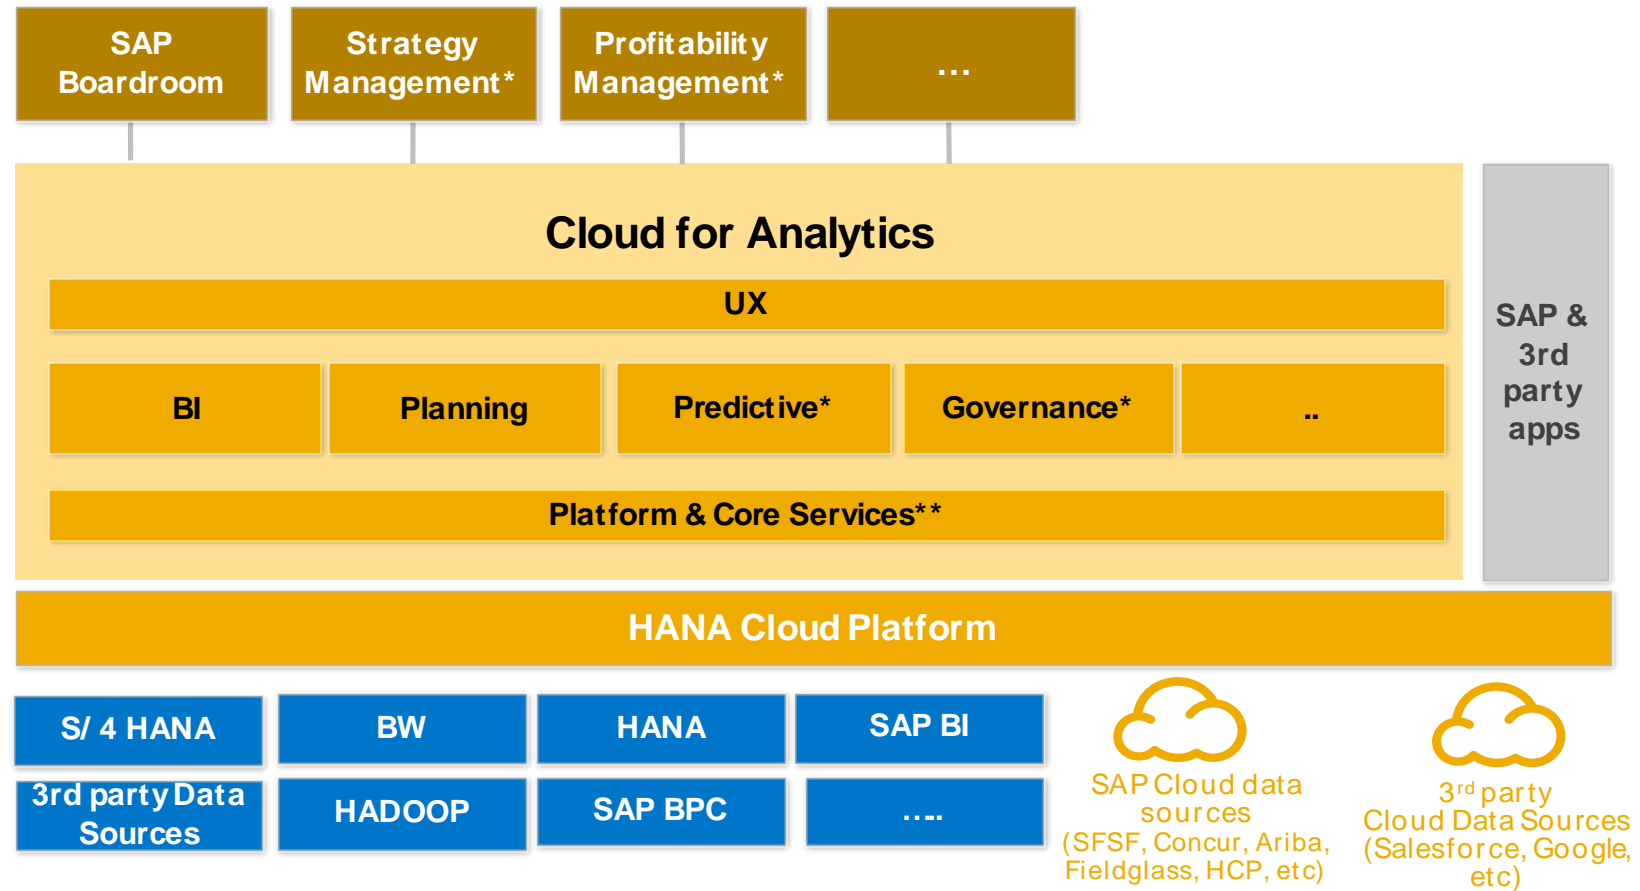

# SAP Cloud for Analytics

## Analytics capability for SAP HANA Cloud Platform

From TOP floor...

...to SHOP floor

\* Launch date TBC

\*\*not sold separately

# Demo

Demo scenario – create dashboard with Cloud for Analytics on top of SAP HANA Cloud Platform data

# Demo

Create SAPUI5 application including charts

# Relevant capabilities in SAP HANA Cloud Platform

Load data

Create views

Create visualizations + dashboards

Embed in context

# Portal Services

## Embed visualizations into SAP HANA Cloud Portal

Integrate your analytics applications or dashboards into business sites

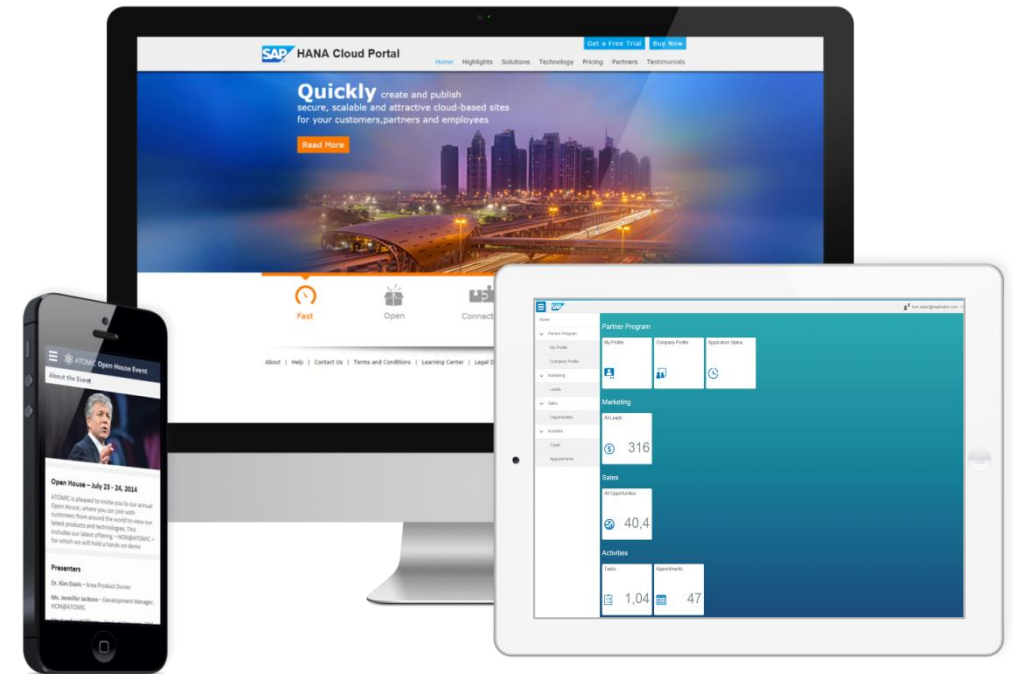

SAP HANA Cloud Portal provides an easy way for creating cloud-based business sites for your customers, partners and employees.

### Key capabilities

- A service of the SAP HANA Cloud Platform
- Designed for mobile as a leading design principle
- Integrated with on premise and cloud based systems (SAP and non-SAP)
- For extending SAPs SaaS offerings (e.g. SuccessFactors, C4C)
- Role-based user authorization

### Benefits

- Multi-language site support
- Fast branding and customization
- Sites and Fiori experiences entry points
- Integrated developer flows with SAP Web IDE

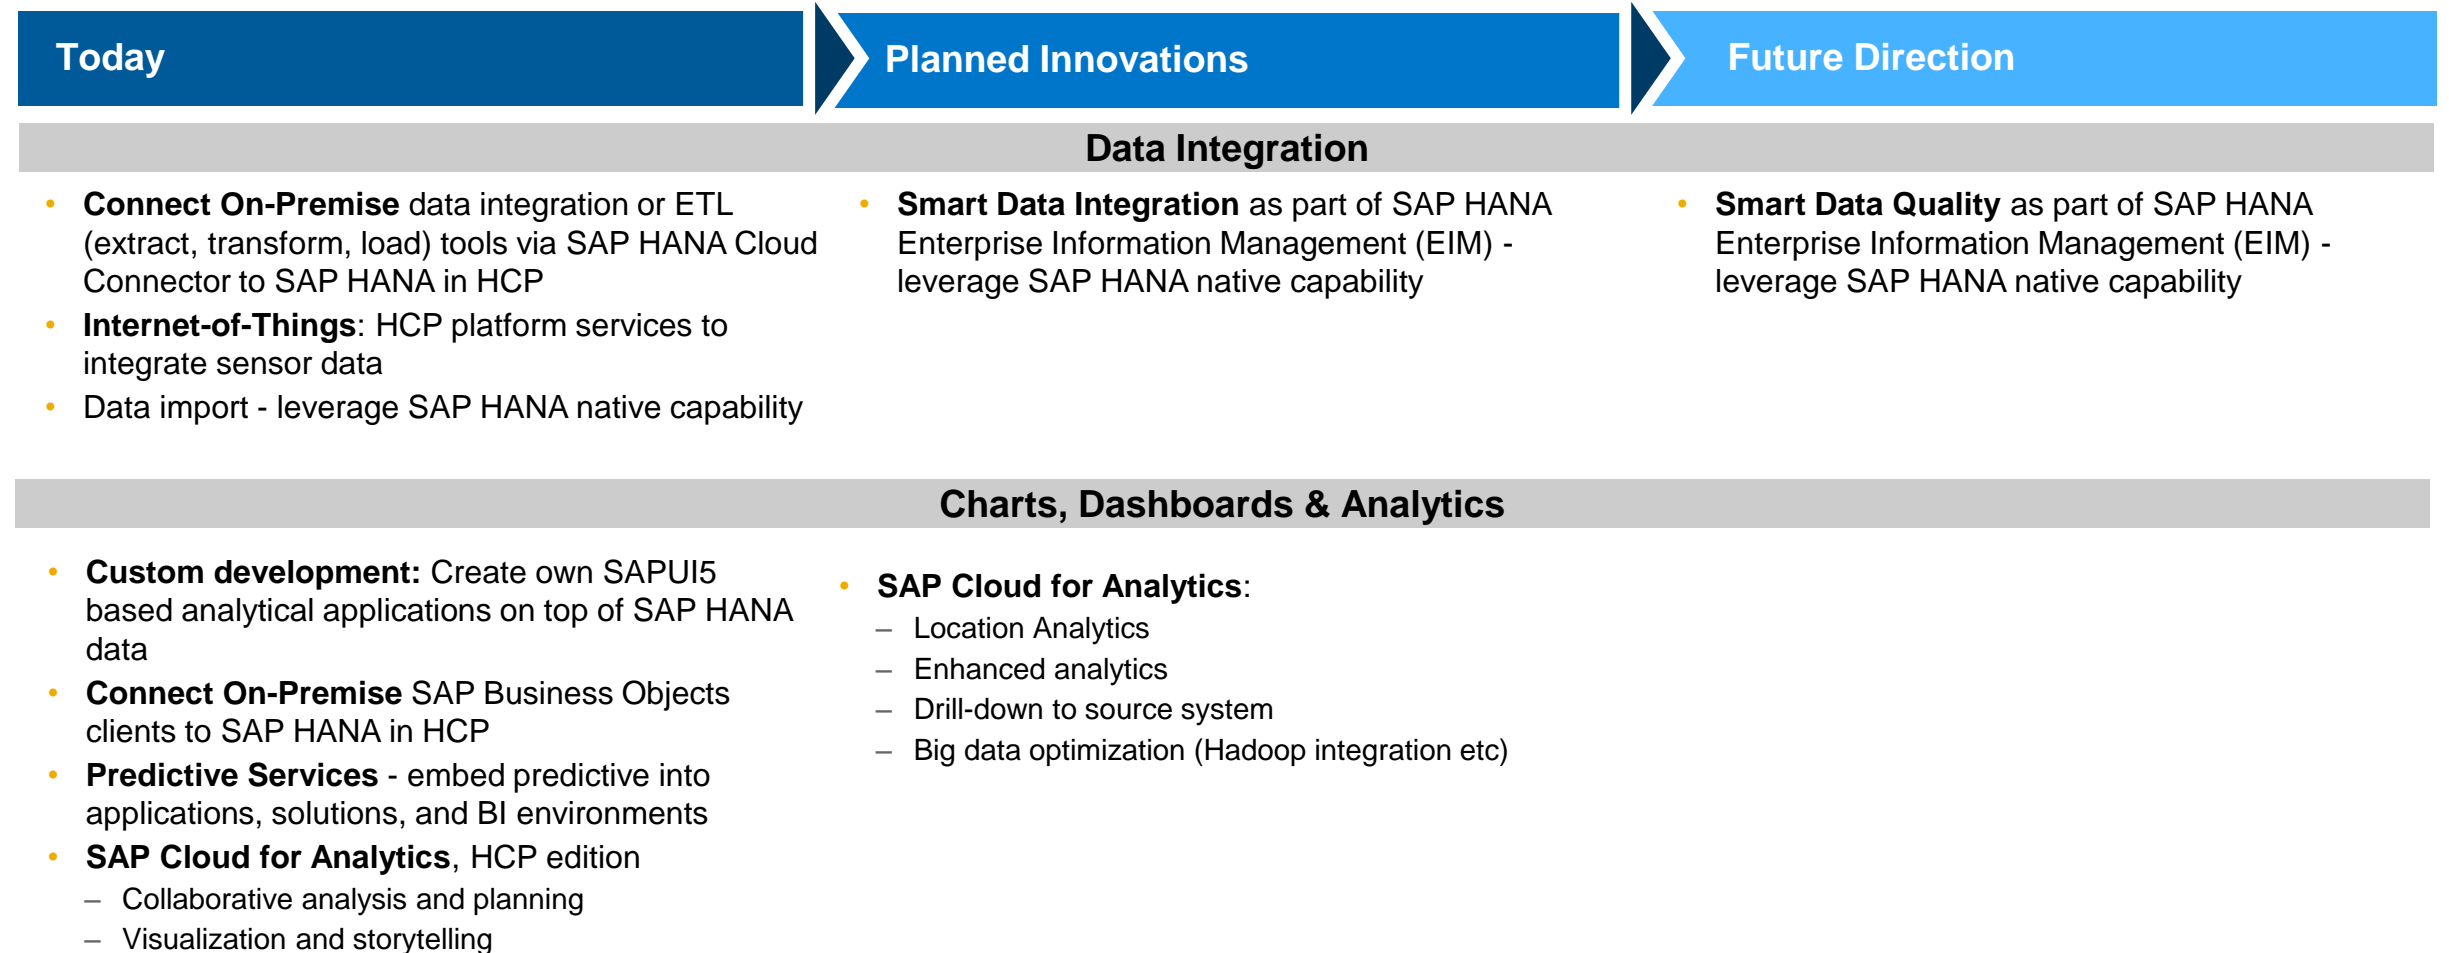

# Roadmap

# Analytics capabilities in SAP HANA Cloud Platform

Road map overview – incl. key themes and capabilities in this context

04. April 2016

This is the current state of planning and may be changed by SAP at any time.

# Summary

# Summary

## Key takeaways

---

- 1** Create your own analytical applications on top of SAP HANA in SAP HANA Cloud Platform today!
- 2** Various options available to load data into SAP HANA, create Fiori-like user interfaces including charts and embed into a bigger context, e.g. Fiori launchpad.
- 3** Exciting roadmap with available and planned innovations, e.g. for
  - data integration
  - predictive services that can be used on top of your SAP HANA Cloud Platform applications
  - SAP Cloud for Analytics to provide easy-to-use toolset for analysts
