# Building on-premise Extensions on SAP HANA Cloud Platform

## AGENDA

---

### **BASIC OVERVIEW**

*Extending Reach and Scope of S/4HANA on SAP HANA Cloud Platform*

### **SOLUTION PATTERNS**

*How to realize SAP Business Suite & S/4HANA Extension Scenarios on SAP HANA Cloud Platform:*

*Point-to-Point Connectivity, Data Replication*

### **DEMO**

*Mobile Extension App running on SAP HANA Cloud Platform with Point-to-Point Connectivity to on-premise SAP Business Suite*

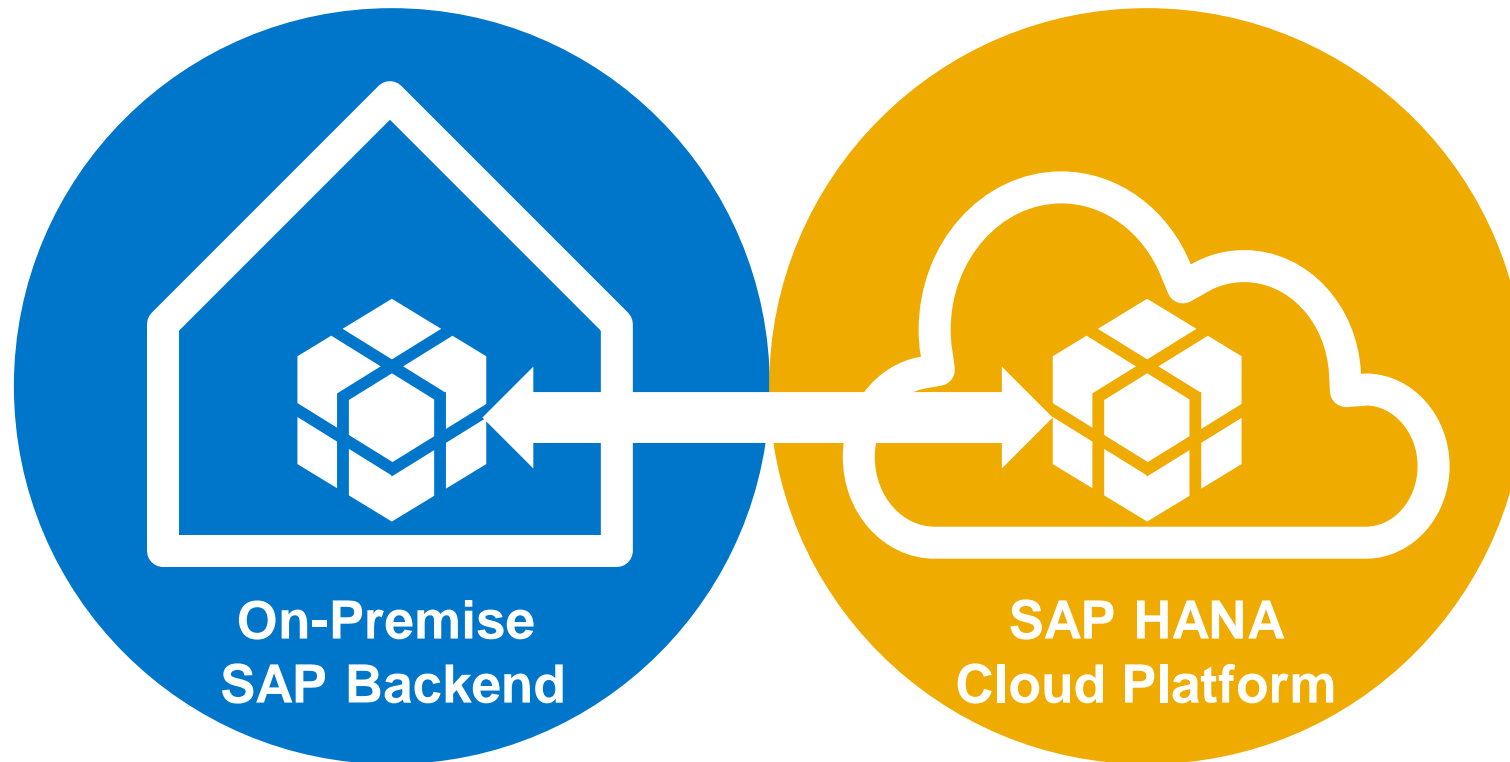

### **RELATED RESOURCES**

# BASIC OVERVIEW

Extending SAP Business Suite and S/4HANA with  
SAP HANA Cloud Platform

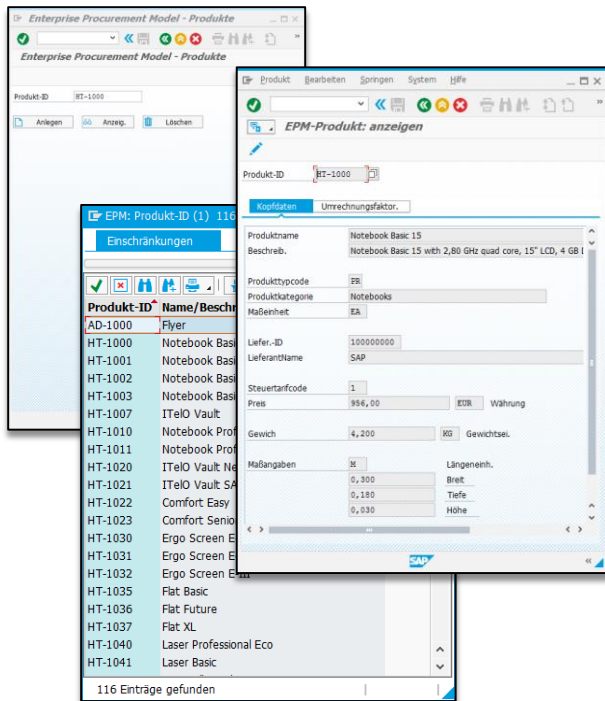

# What is an On-Premise Extension on SAP HANA Cloud Platform?

*Extensions are apps running on the **SAP HANA Cloud Platform** that are integrated with apps running on **on-premise SAP backends**.*

# Extending SAP Business Suite with SAP HANA Cloud Platform

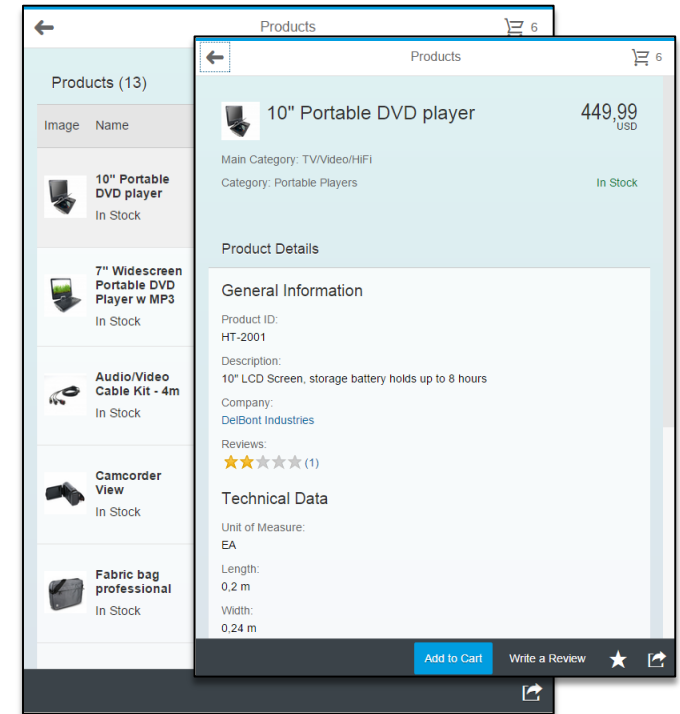

*From ABAP Dynpros  
for employees ...*

*...to mobile apps for  
employees, partners, consumers.*

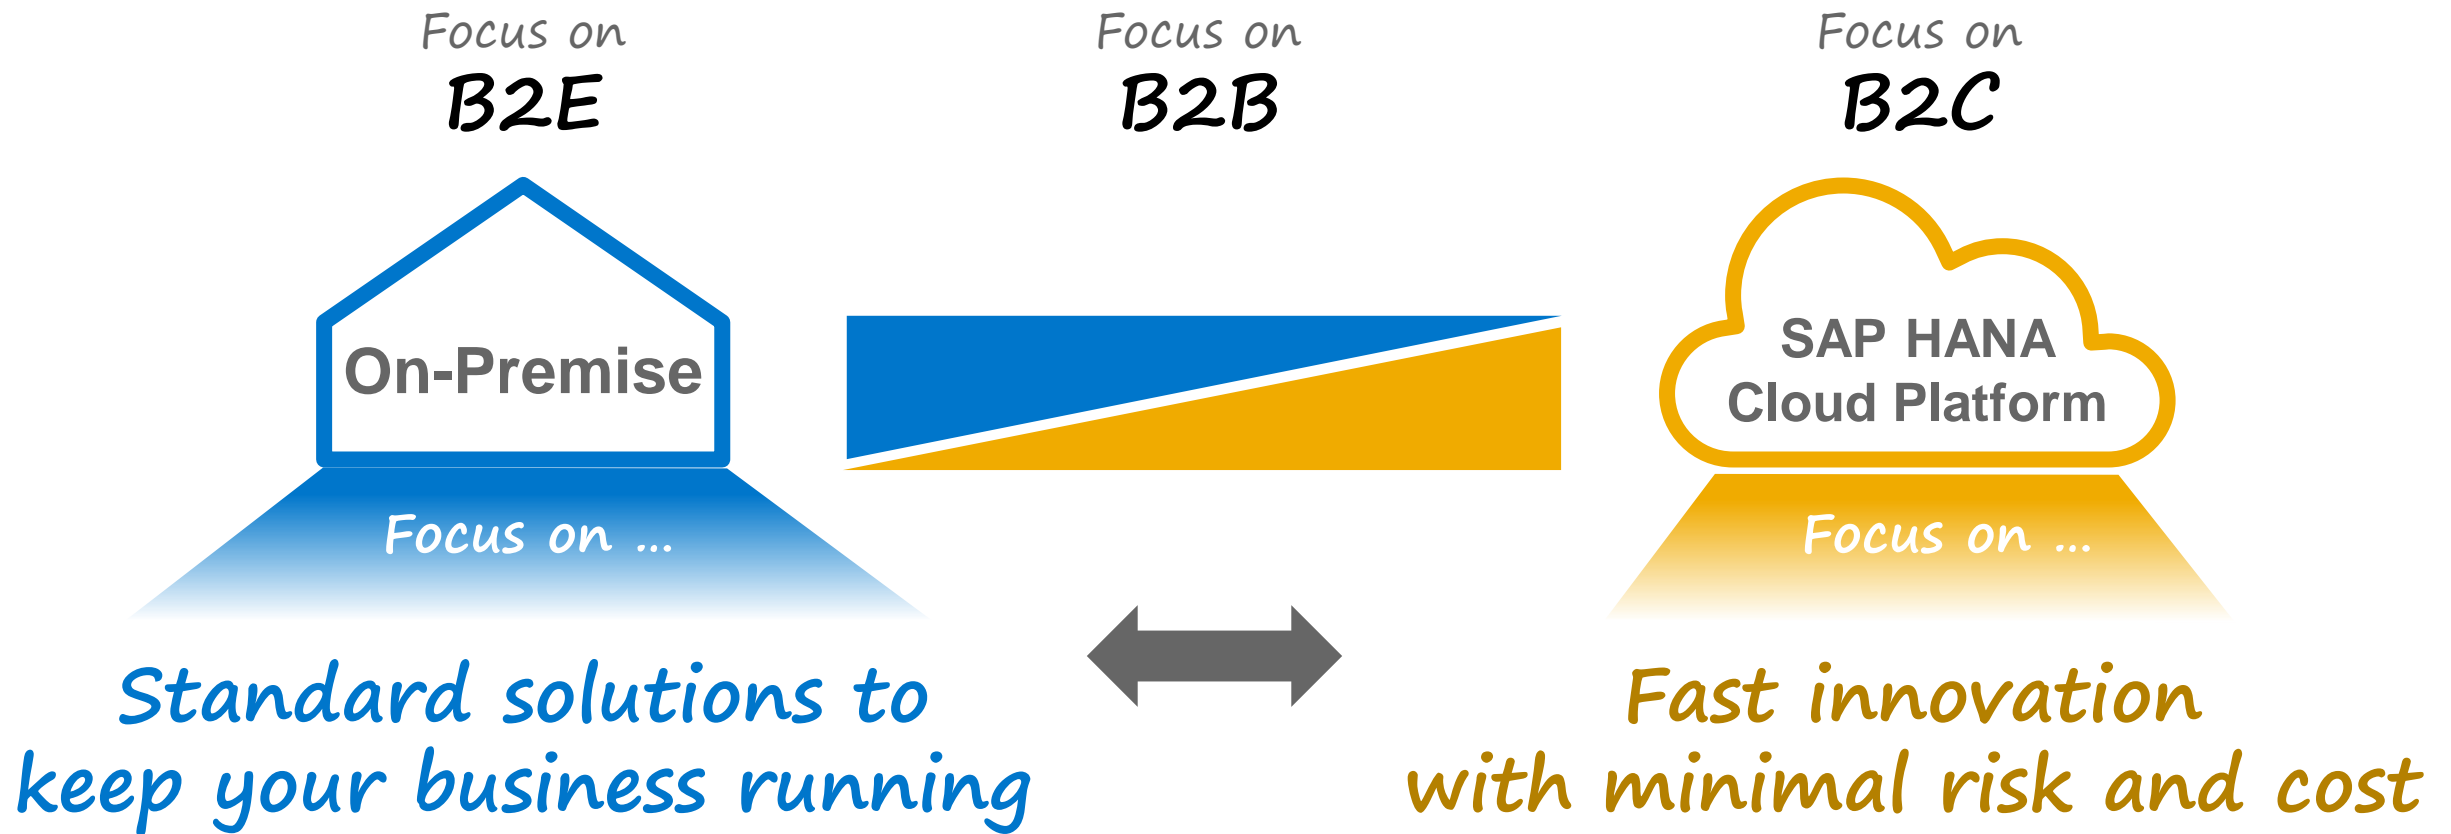

**SAP HANA  
Cloud Platform**

*Extend the Reach of the Suite: New Users – New Devices – New Business Models*

# SAP HANA Cloud Platform Helps to Innovate Fast

Read more: SAP News article: [SAP S/4HANA: Extensions with SAP HANA Cloud Platform Possible in 2015, \(in german\)](#), by A.Schmitz, 2015/9

# On-Premise Extensions with **SAP HANA CLOUD PLATFORM**

## Innovation is Extending Reach and Scope

Extend  
Your **Reach**

Reach more  
devices

Reach  
more users

Business  
around the globe

Business  
around the clock

Extend  
Your **Scope**

New user  
experience

New  
functionality

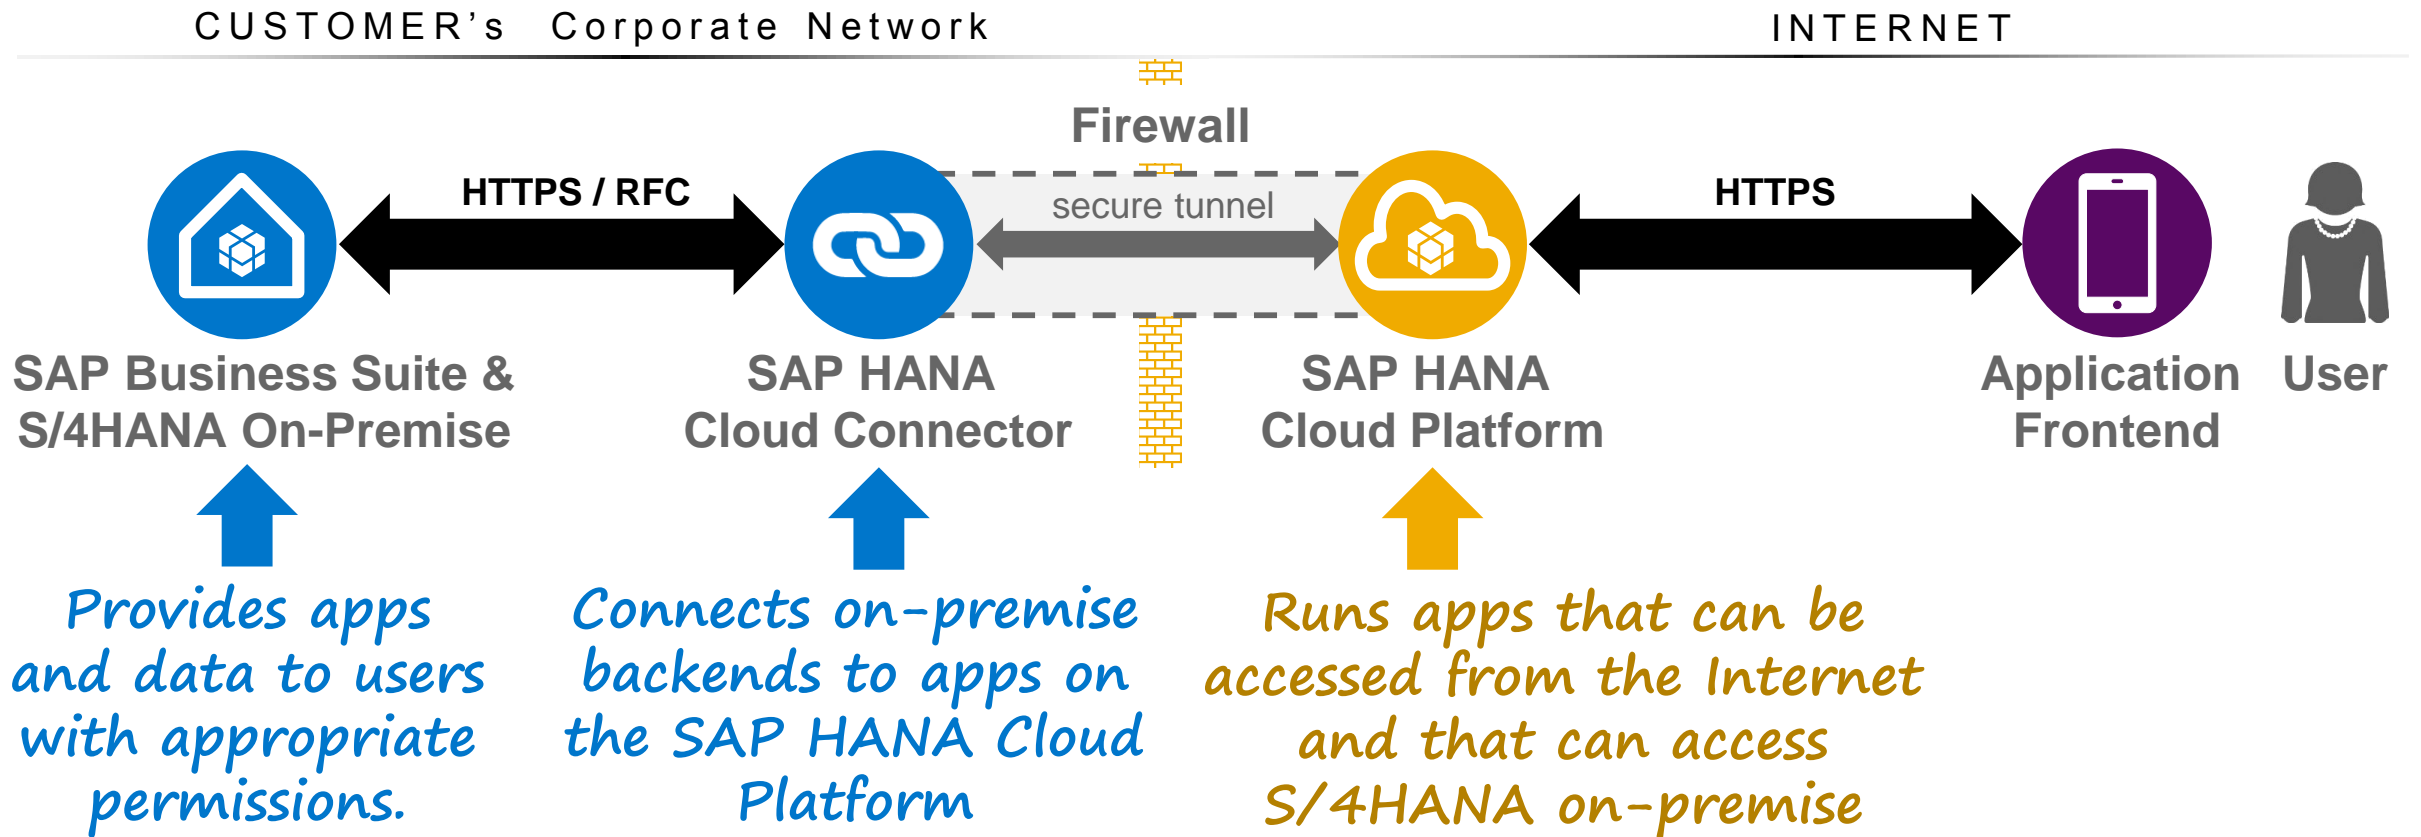

New  
data

New use  
cases

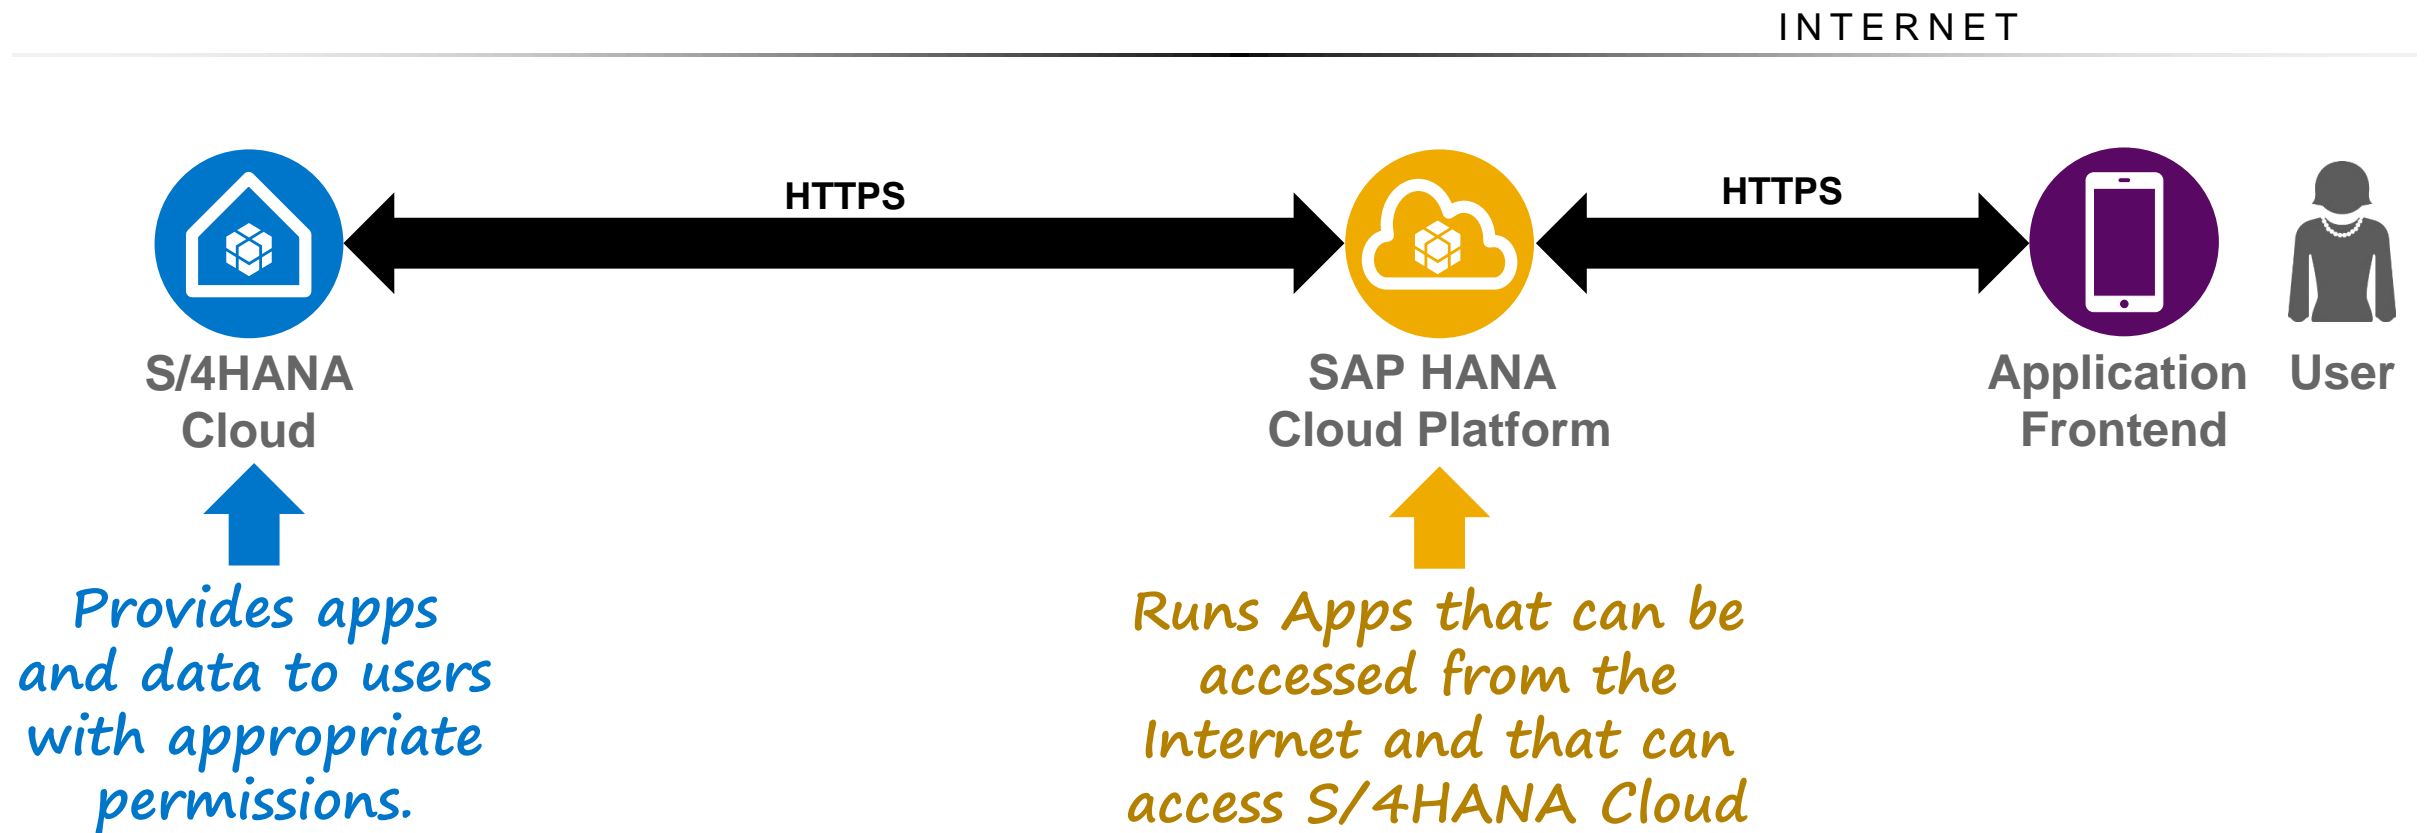

# Extending On-Premise Business Suite on SAP HANA Cloud Platform

## Basic Overview

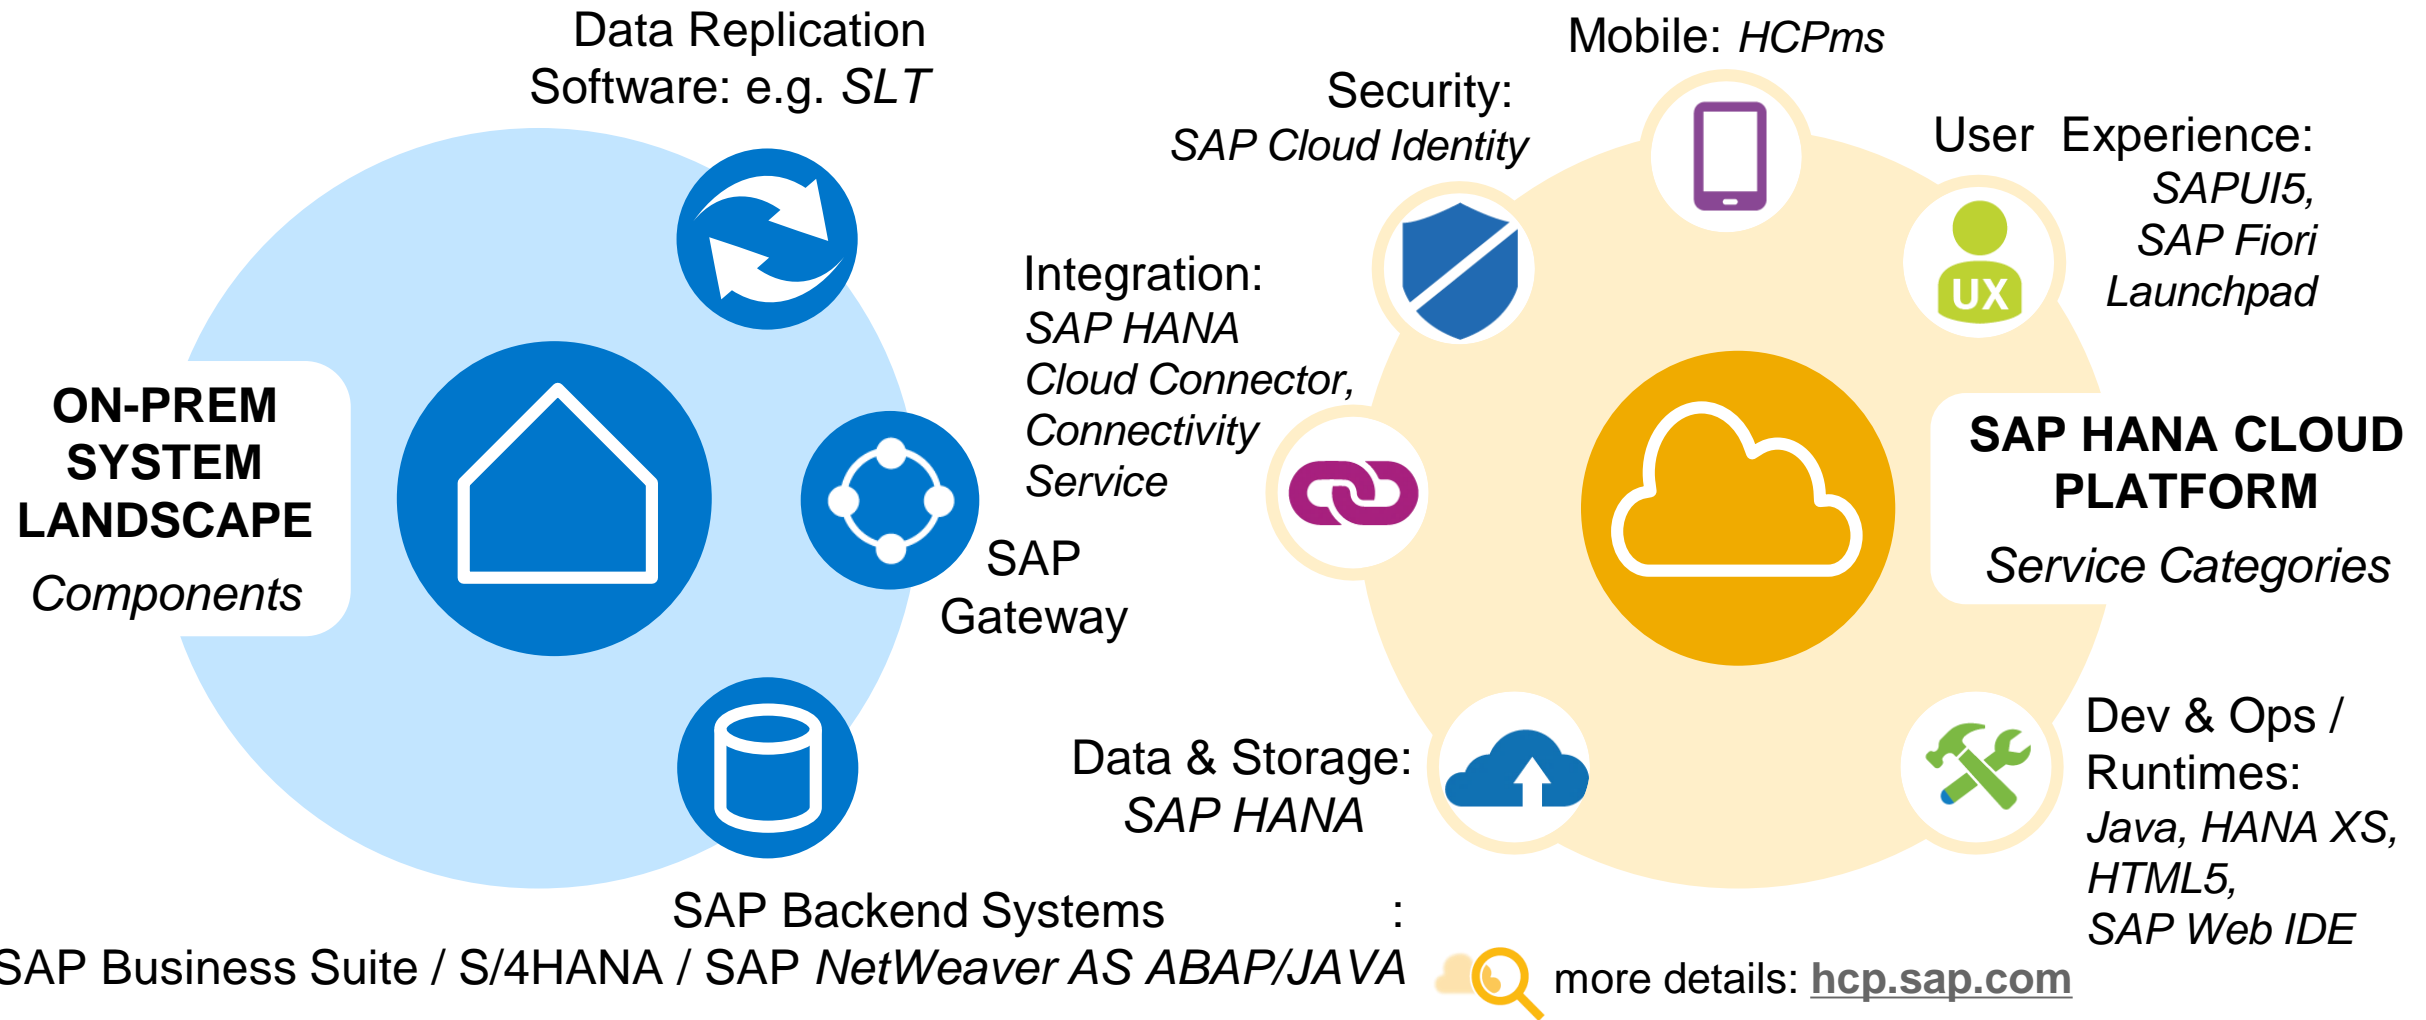

# Extending S/4HANA Cloud Edition on SAP HANA Cloud Platform

## Basic Overview

# Everything You Need to Build Your Own SAP Business Suite Extensions on SAP HANA Cloud Platform

# Everything You Need to Build Your Own SAP Business Suite Extensions on SAP HANA Cloud Platform – Service Details

## Integration

The **SAP HANA Cloud Connector** and the **Connectivity Service** allows a secure integration with on-premise systems.

## Dev & Ops

**SAP Web IDE** is a web-based tool that simplifies the end-to-end application lifecycle. It enables developers, business experts & designers\* to build **Fiori** and **SAPUI5 experiences** for custom apps.

## Data Storage

**SAP HANA** is a modern platform for real-time analytics and applications. It enables organization to analyze business operations based on large volume and variety of detailed data in real-time, as it happens.

## Mobile

The **SAP HANA Cloud Platform, mobile services** enable developers build mobile apps for iOS, Android and Windows with a scalable cloud backend.

## Security Services

**SAP Cloud Identity** provides central user authentication, web single sign-on and user management as Software-as-a-Service (with SAML, OAuth protocols). **SAP HANA Cloud Platform Security services** provide delegated authentication and authorization services across applications.

## User Experience

**SAP HANA Cloud Portal** provides an easy way for creating enterprise-grade business sites with authorization management, content development and integration to SAP's cloud, on-premise and third-party solutions. **SAP Fiori launchpad** is a role based, personalized aggregation point for business applications and analytics.

# SOLUTION PATTERNS

How to realize SAP Business Suite & S/4HANA  
Extension Scenarios on SAP HANA Cloud Platform

2 Key Scenarios: **1/ Point-to-Point Connectivity**  
**2/ Data Replication**

# Integrating with on-prem SAP Backends on SAP HANA Cloud Platf.

## The Point to Point Connectivity Scenario – Overview

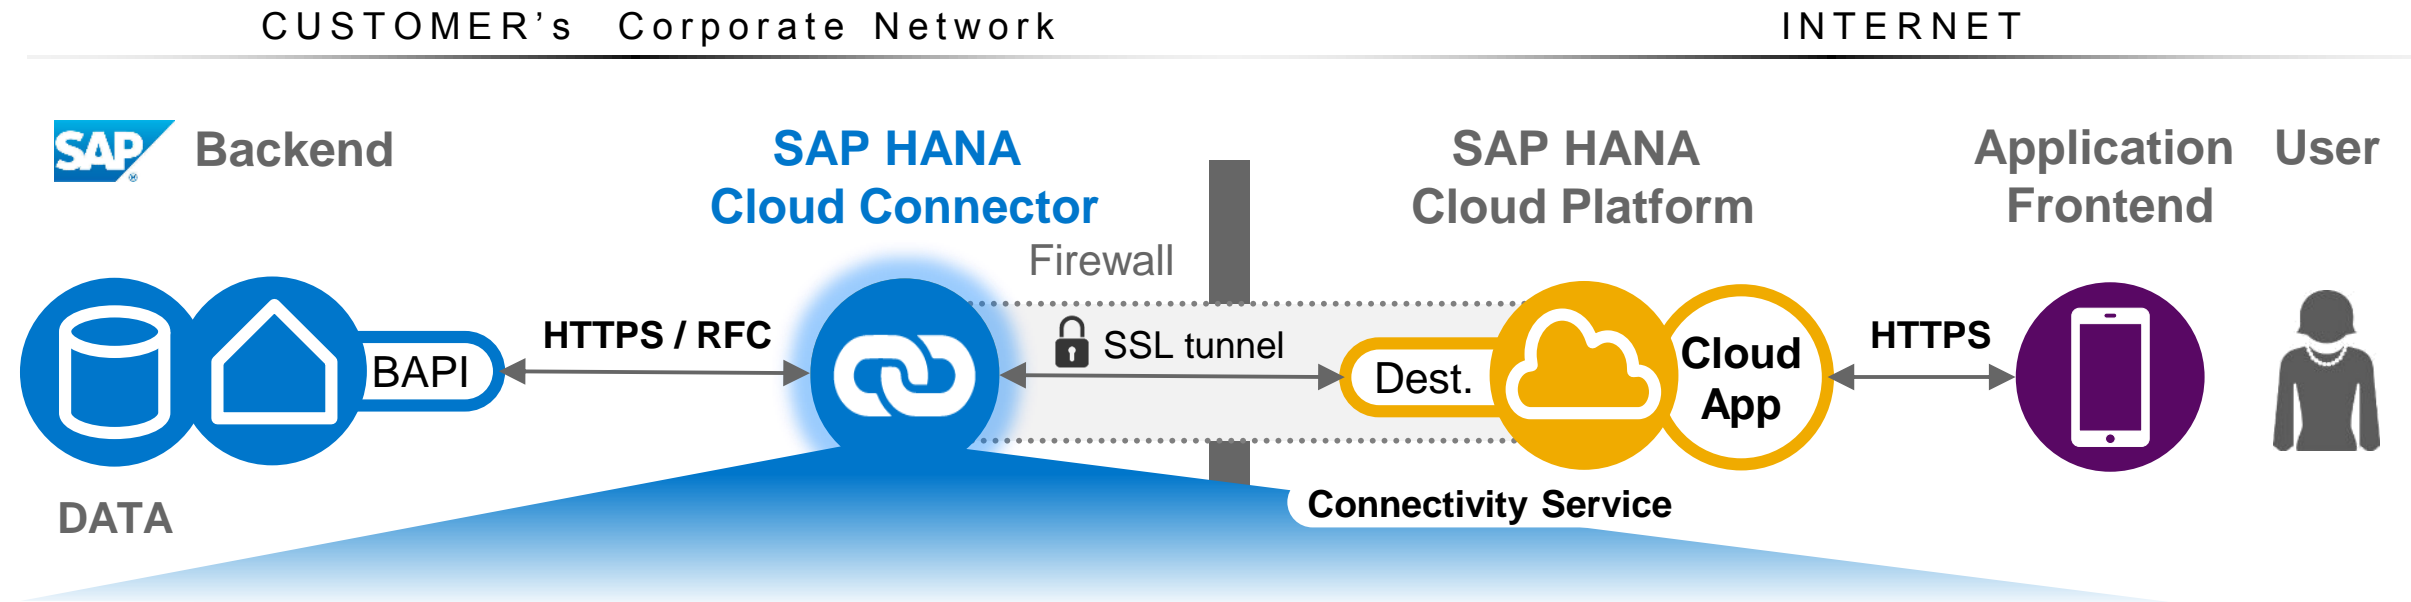

*Connect the Cloud App to on-premise backend APIs. Consume RFC directly or use OData via SAP Gateway. The Cloud app operates directly on these APIs.*

# SAP HANA Cloud Connector in a Nutshell

## How does it work?

Read more: SCN doc [“SAP HANA Cloud Connector Solution Brief”](#), by Timo Lakner, Dec 2014

*SAP and non-SAP systems supported*

- *no changes required in backend systems (apart of trust config)*

*SSL connection established to HCP through reverse-  
invoke approach*

- *no changes in corporate firewall needed*
- *no internet exposure of internal resources/systems*

*Multiple protocols supported: HTTP, RFC*

*Two times termination between end user and backend  
a) on cloud side on the application, b) on SCC side*

*Enterprise-ready for critical business scenarios (e.g.  
audit logging, high availability, fine-grained access  
control on resource level, etc.)*

# Platform Services: Integration

## SAP HANA Cloud Connector

Source: <http://service.sap.com/saproadmaps> > Database & Technologies > SAP HANA Cloud Platform

The SAP HANA Cloud Connector allows a secure integration with on-premise systems. This enables easy integration of the on-premise data with the SAP HANA Cloud Platform.

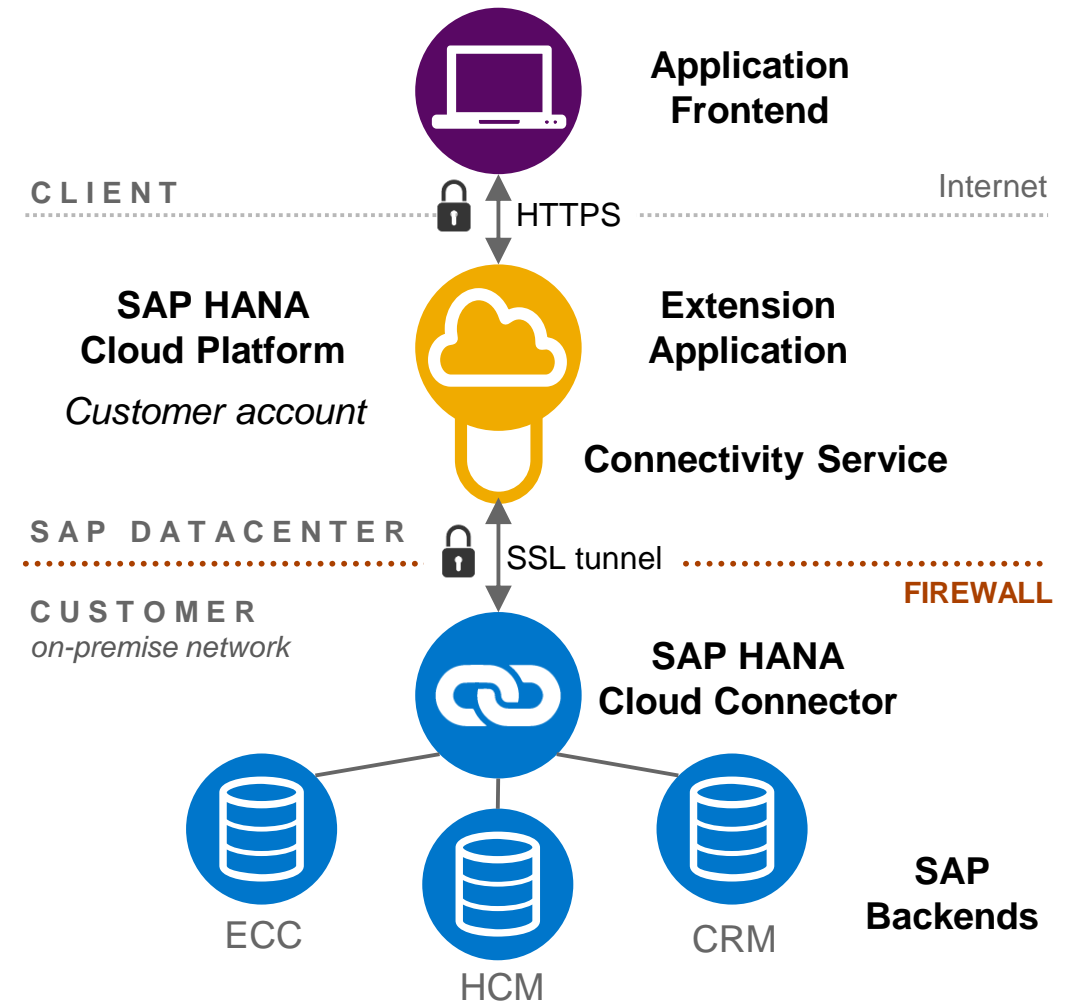

### Key capabilities

- On-premise agent establishes secure SSL VPN connection between the SAP HANA Cloud Platform and on-premise systems
- Supports pre-configured “Destination API” and certificate inspection to safeguard against forgeries
- Supports multiple protocols (HTTP, RFC, JDBC), high availability and principal propagation

### Benefits

- Complementary to SAP Gateway, HANA Cloud Integration and 3rd party integration suites both on-premise and in the cloud

INTERNET

\* Connectivity Destination

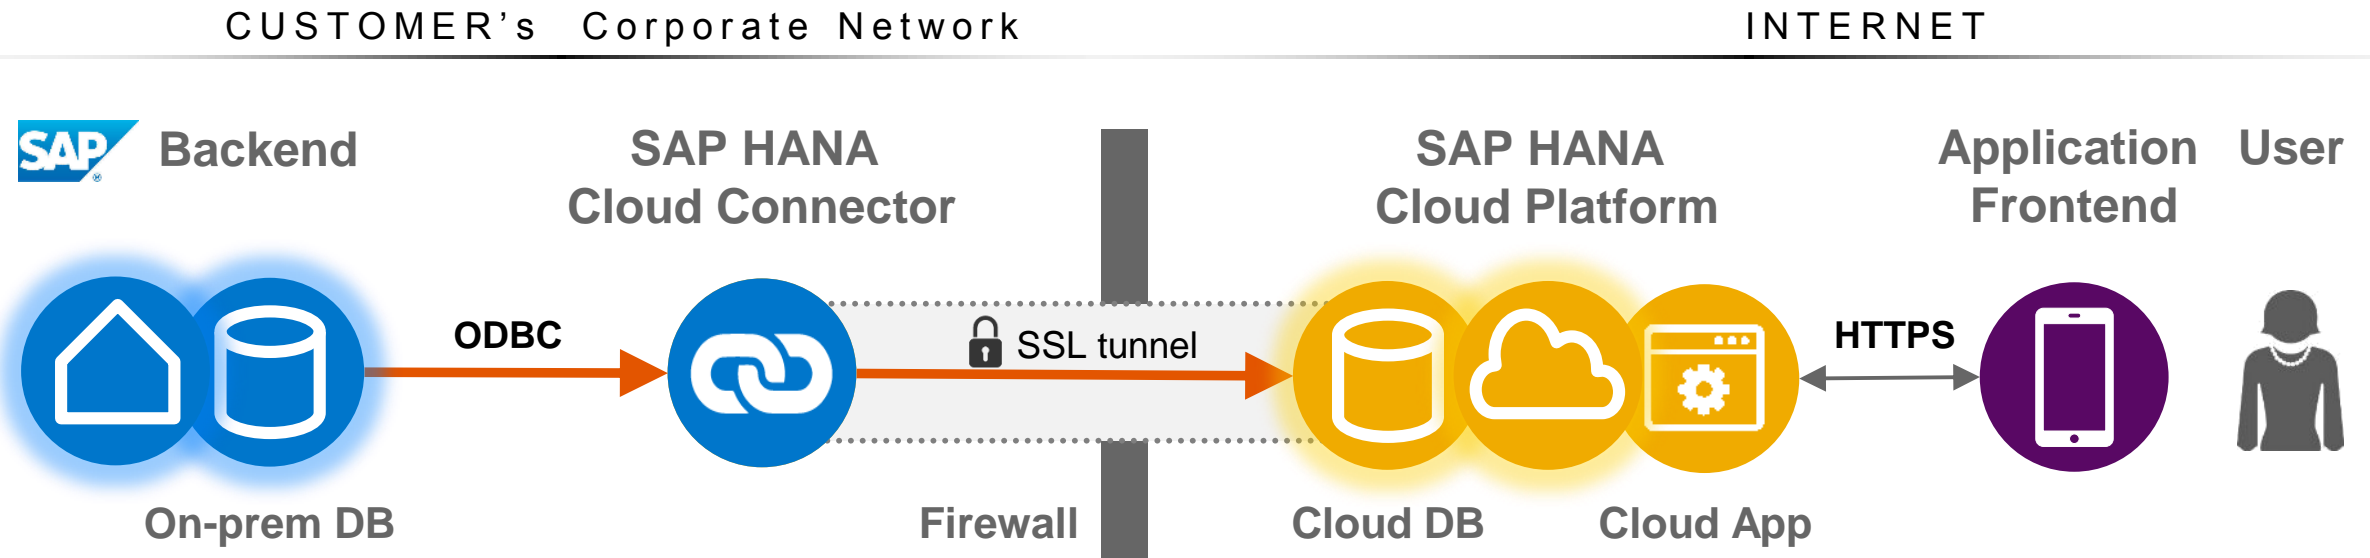

# SAP Business Suite Extensions on SAP HANA Cloud Platform

## Scenario Overview: Point-to-Point Connectivity and Data Replication

# Integrating with on-prem SAP Backends on SAP HANA Cloud Platf.

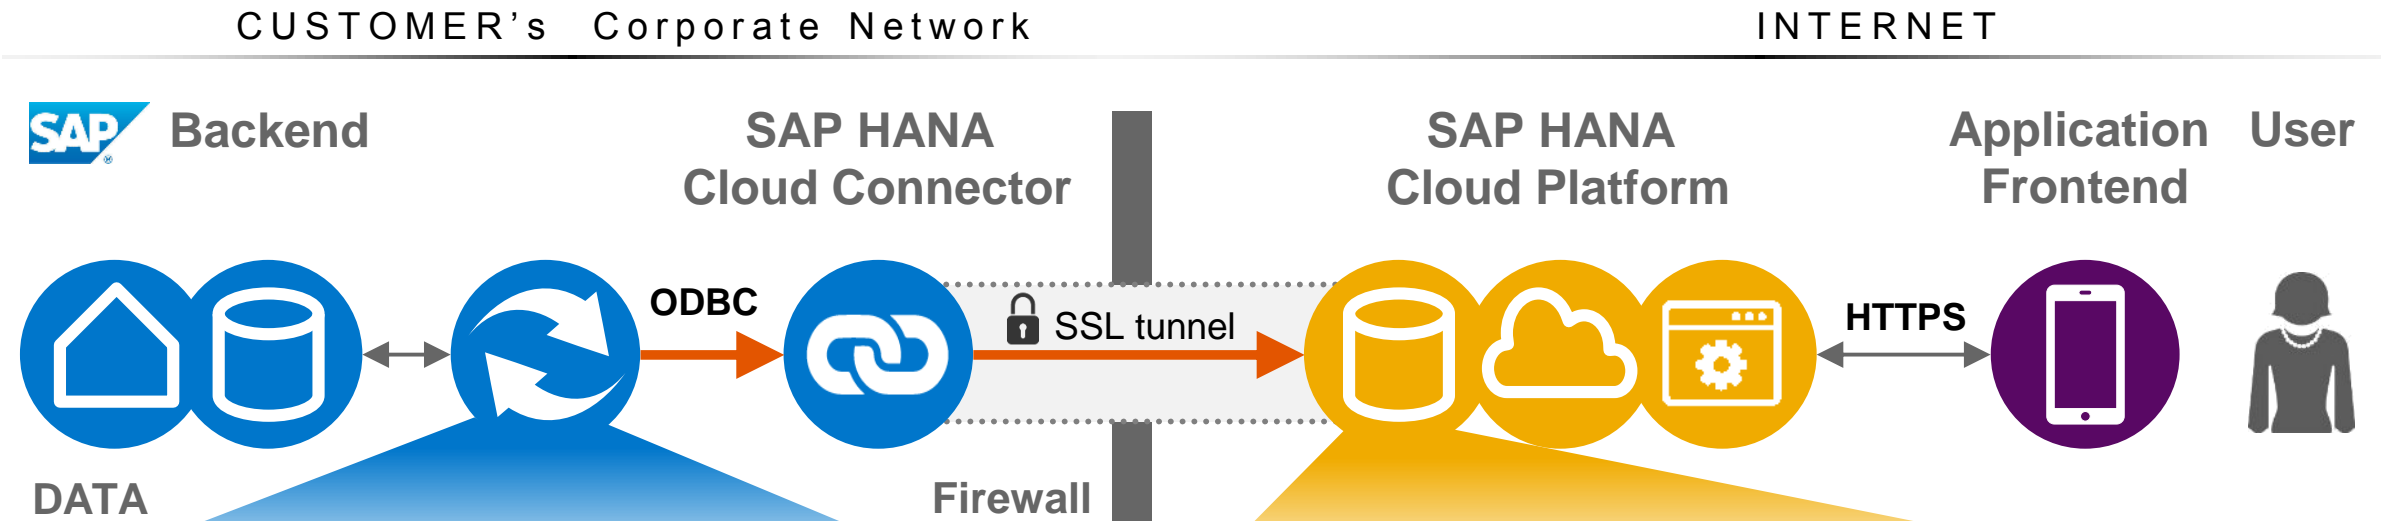

## The Data Replication Scenario – Overview

*Replicate the required on-premise backend to the Cloud. Use an on-premise or cloud-based replication solution. The Cloud app operates on this data in the Cloud.*

# Using On-Premise Replication Solutions

## Required Products and Releases

Works with all SAP backends supported by on-premise replication solutions like

- SAP LT Replication Server (SAP SLT) or
- SAP Data Services (SAP DS) or
- other solutions with required DB connectors

NOTE: requires extra database license for replication scenarios

### SAP HANA Cloud Platform Services

- Compute Units and/or SAP HANA XS
- Connectivity Service with SAP HANA Cloud Connector, Persistence Service

### SAP HANA Cloud Platform DB as a Service

- SAP HANA and/or SAP ASE database\*

\* SAP Adaptive Server Enterprise: relational database, formerly SAP Sybase ASE

# Using Cloud-based Replication Solutions Required Products and Releases

CUSTOMER'S Corporate Network

INTERNET

Works with all SAP backends supported by cloud-based replication solutions

**NOTE:**  
You need a database license for replication scenarios

Cloud-based replication solutions

- SAP HCI data services (with agent) or
- SAP HANA smart data integration (with agent)

- SAP HANA Cloud Platform Services: Compute Units and/or SAP HANA
- SAP HANA Cloud Platform DB as a Service : SAP HANA and/or SAP Adaptive Server Enterprise (ASE) database\*

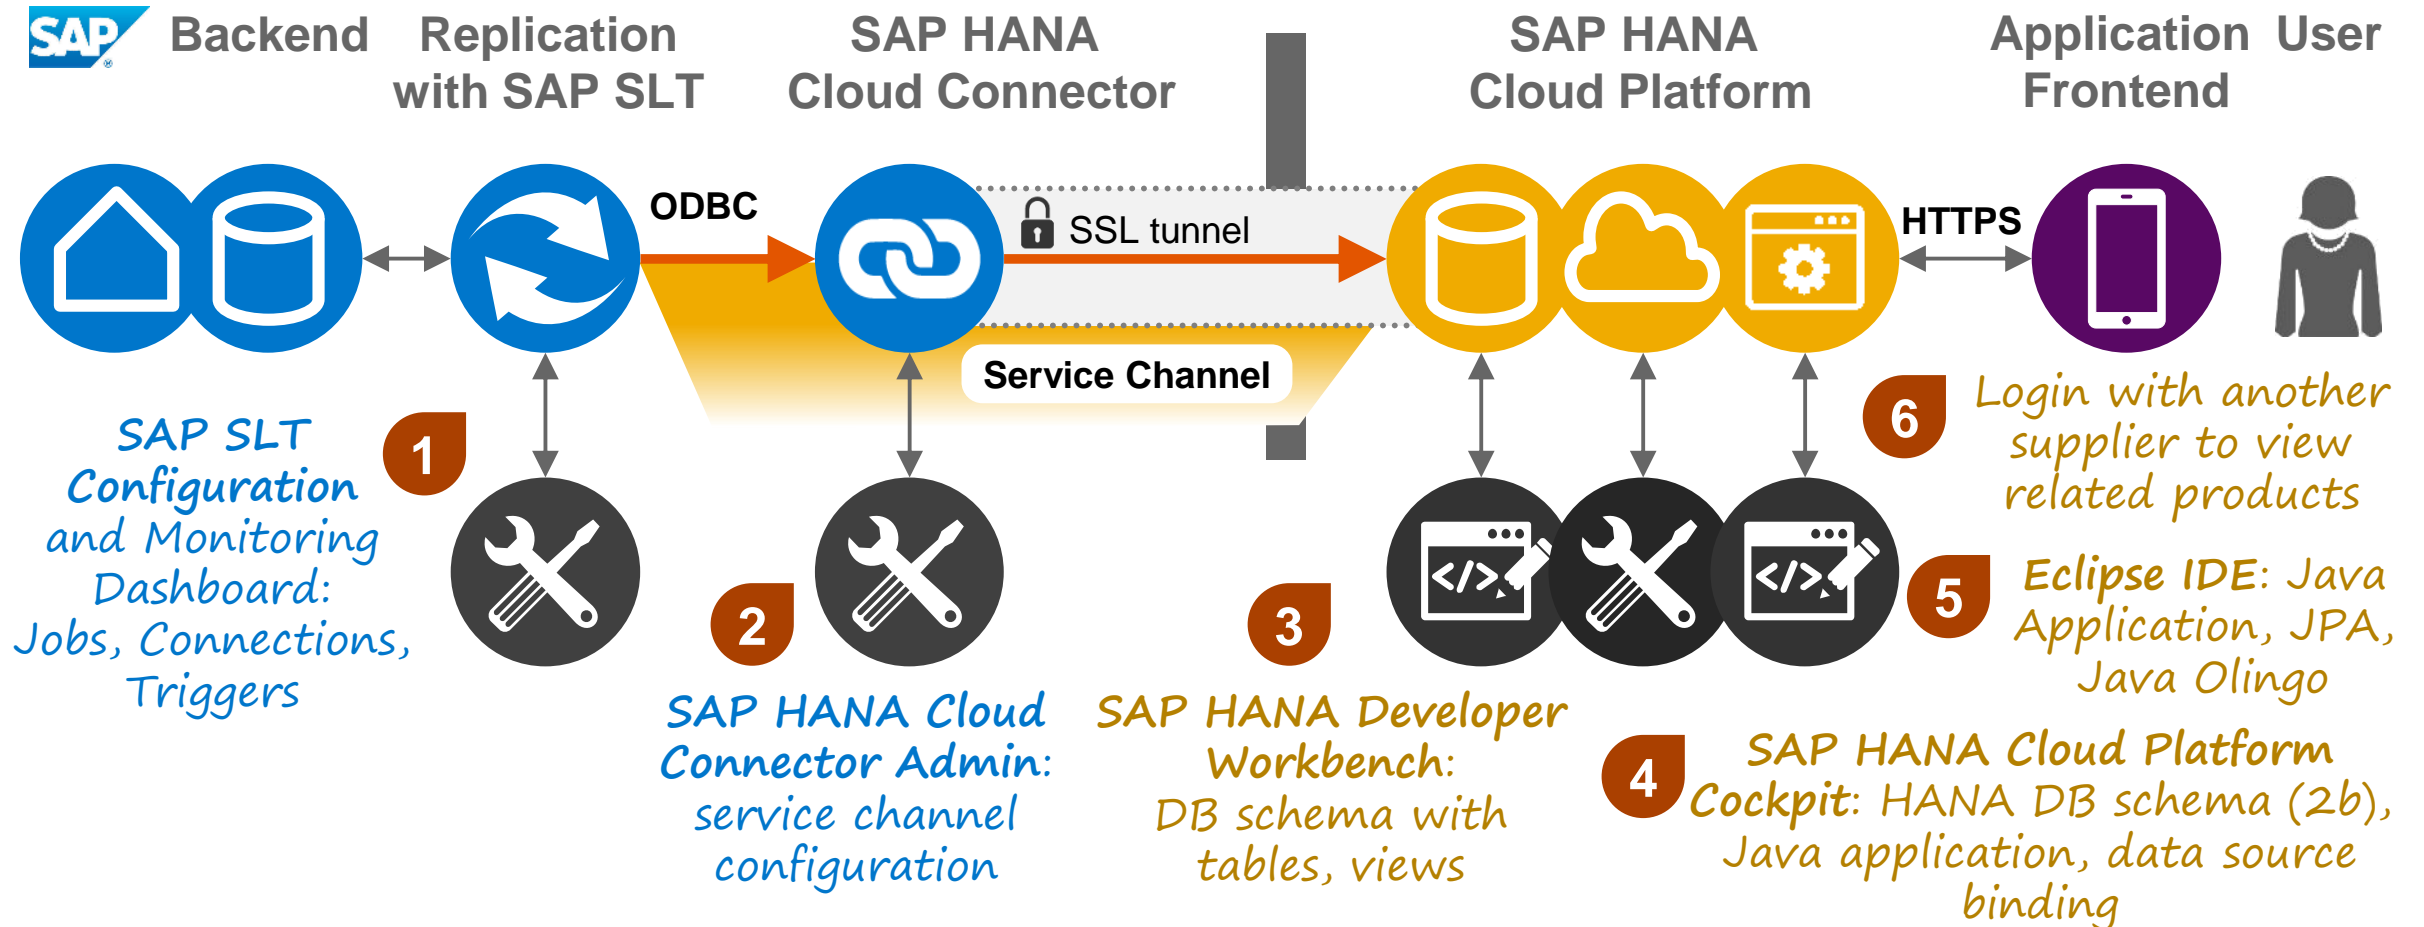

\* SAP Adaptive Server Enterprise relational database: formerly SAP Sybase ASE

# Data Replication Demo (SLT, HANA DB, Java, JPA, Olingo, SAPUI5)

# Data Replication Scenario

## Sample Application OPTION A: HANA DB + Java/JPA/Apache Olingo

# Data Replication Scenario

## Sample Application OPTION B: SAP HANA XS App with OData

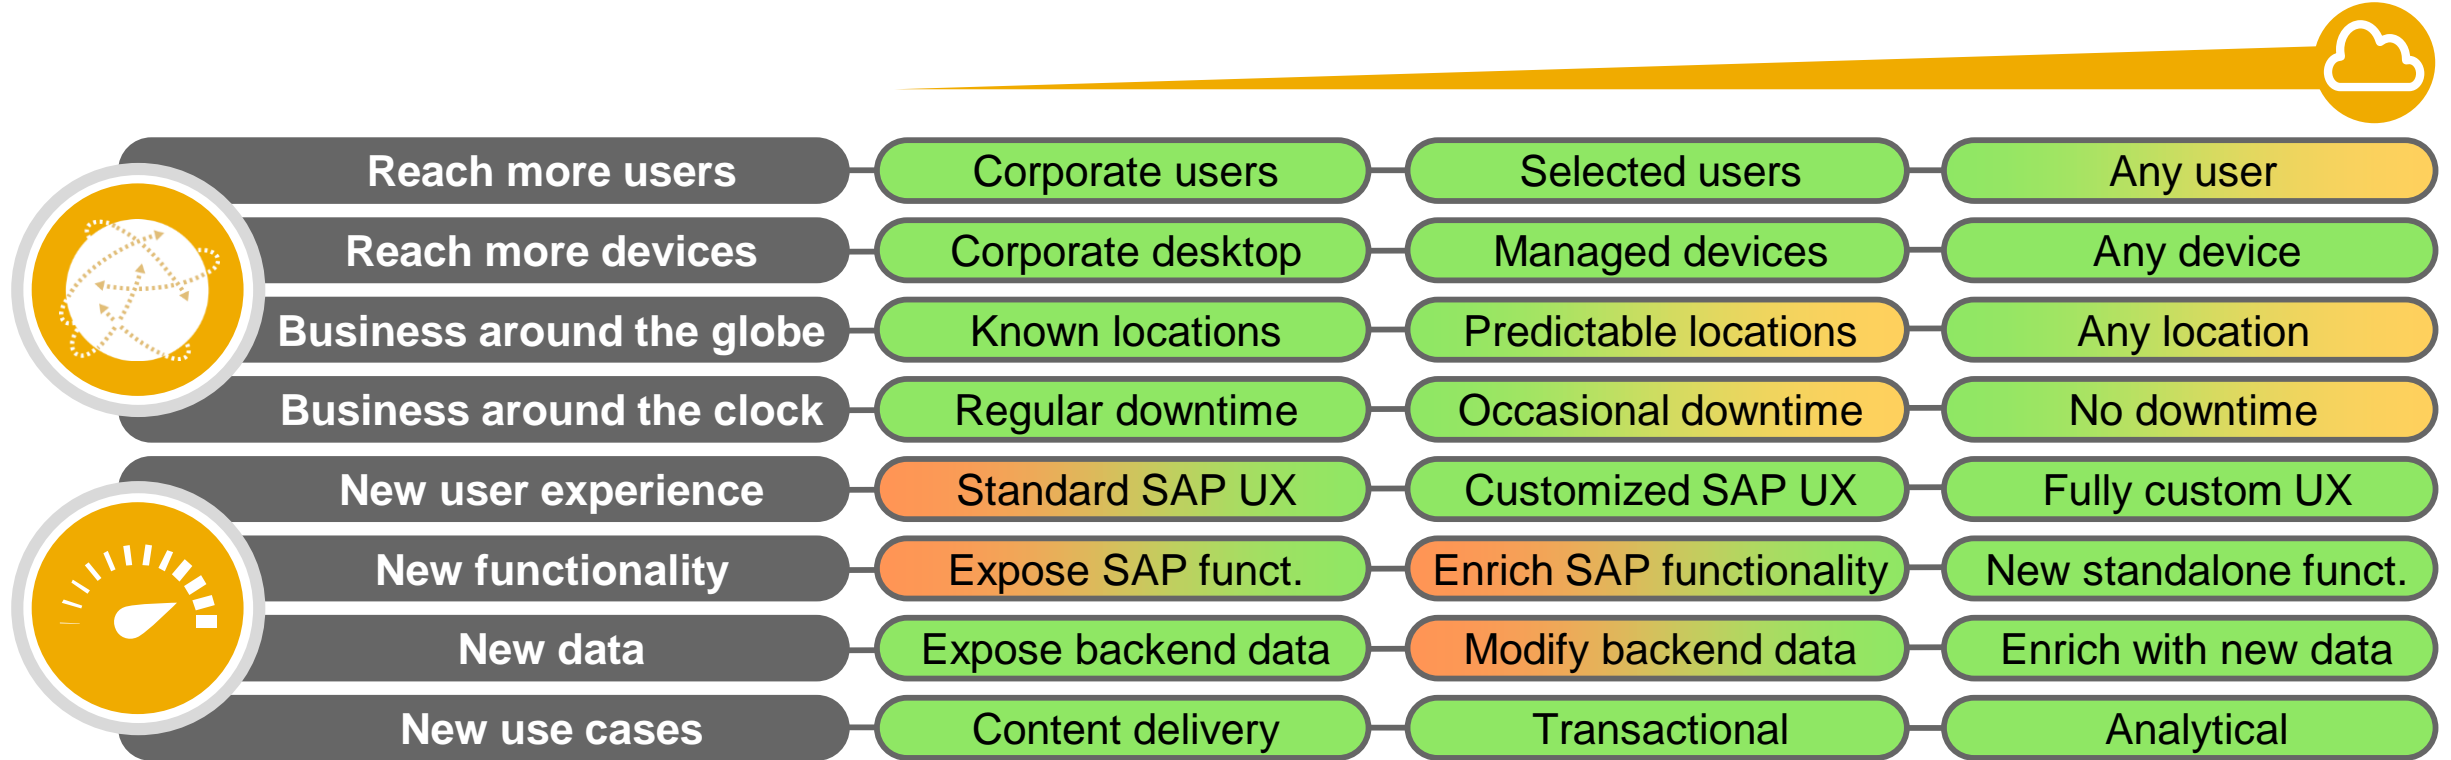

# TAKE AWAYS

# SAP Business Suite Extension Patterns with SAP HANA Cloud Platf.

When to Use What?

 Data Replication | 
  Point-to-Point 
 recommended
not recommended
not feasible

*The Data Replication Pattern is well suited to minimize distance to the user, handle flexible workloads, decouple backend and extension.*

*Both patterns can be combined!*

*The Point-to-Point Connectivity Pattern is well suited to provide standard or custom SAP UX, reuse SAP functionality, implement CRUD operations.*

# All SAP Backends since R/3 4.6C up to S/4HANA can be extended with SAP HANA Cloud Platform

**Classical R/3**

4.6C | Enterprise

**Suite on NetWeaver**

NW 2004 | NW 7.x | NW 7.4

**S/4HANA**

On-Premise | Cloud

can be extended with **SAP HANA Cloud Platform**

# Where to find more Information

## Benefit from Developer Edition

- Free unlimited trial of the SAP HANA Cloud Platform at <http://hcp.sap.com/developers>

## Subscribe for openSAP courses

- In-depth courses for SAP HANA Cloud Platform available online free of charge at <http://open.sap.com>

## Participate in SAP Community Network

- Follow the blogs and join the discussions at <http://scn.sap.com/community/developer-center/cloud-platform>

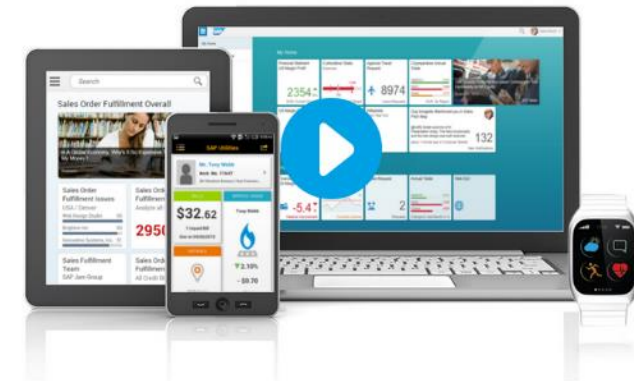

## Explore the free sample code for developers

- Leverage your start on the SAP HANA Cloud Platform with sample code from <http://sap.github.io>

## Now the Business App is Personal

SAP HANA Cloud Platform is an open platform-as-a-service providing unique in-memory database and business application services. Quickly build, extend, and integrate modern, mobile-enabled apps – simply – to meet your business needs now.
